Prologue

Enhanced humans acting as artificial ability users, guns, and even tanks are nothing more than toys to these criminal organizations. It is clear to all that Synapse's efforts have greatly reduced the number of ability-related crimes in Japan. But those rogue organizations covet the abnormal powers possessed by Synapse. To steal those abilities, they've begun hunting down Synapse members. More than half a century has passed since the end of the Great War... During the postwar chaos, military research into supernatural phenomena that Japan had aggressively pursued during the war began to spread through the underworld. The research mainly focused on the brain activity of adolescent girls, leading to the discovery and explanation of a series of phenomena, while also exploiting their powers. As a result, countless girls ended up as dissection specimens. The Shijoji Zaibatsu, which helped keep the United Nations from collapsing, later used its vast financial power to fund the creation of an agency for researching and developing abnormal abilities. This agency was eventually elevated to a national institution dedicated to protecting those girls. It opened a new path for gifted girls: using their powers as supernatural crime-enforcement officers. The group they formed was the Special Supernatural Crime Response Unit, "Synapse." Some armed criminal organizations have equipped themselves with weapons that illegally use abnormal abilities. They have also organized "Enhanced Humans"—artificial ability users whose physical functions have been drastically improved through surgery. Against such criminal organizations, guns and even tanks were nothing more than toys. But when they ran into genuine ability-user girls, trained and equipped to boost their powers, their strength was pitiful as a baby's, and they were exposed and destroyed one after another. Thanks to Synapse's efforts, the number of ability-related crimes in Japan has dropped significantly. That much is certain. Meanwhile, ability researchers who fled overseas used their research and dissection techniques to gradually uncover the secrets of the girls with the most advanced abilities...

I'll turn these punks into charcoal. Bring it on!

Minato Tsubaki (11). An agent of the psychic organization "Synapse." She can unleash flames from both hands, firing explosive blasts in the direction she points. Though her power is massively destructive, it's extremely hard to control, so Minato's outfit was designed specifically to help regulate it. But after relying on the functions of her bodysuit for so long, she's gradually neglected her own control over her abilities. To prevent collateral damage when Minato isn't wearing her suit, the Director of Synapse ordered that she must wear power-control devices.

As a psychic, she possesses a rare kind of talent. Trusting only her natural gifts, she makes no effort to improve, while remaining incredibly arrogant and self-assured. She looks down on others and refuses to acknowledge anyone but herself. Not only with criminal organizations, but even with her own comrades, she uses her powers to flaunt her talent, which has earned her the dislike of those around her. For Minato, burning enemies to a crisp is just a way of showing off; even though her opponents are criminals, she doesn't see them as human beings at all. She always ranks first in her schoolwork, but her arrogance has left her completely unpopular. Even when dealing with school faculty, she acts haughtily, backed by her status as an agent of a national agency. When violent psychic crimes occur, she rushes to the front lines to satisfy her need to show off, and today she's heading to the crime scene alone.

You're just a bunch of worthless, stupid small fry. I'll personally burn you to death, so you'd better cry and thank me.

Take this!
Take this!
You disobedient brats, I'll burn every last one of you to a crisp. To think you'd dare oppose the power of the state—you really are fools.

Eh?

That arrogant, loathsome little brat was finally neutralized. It's a good thing we had this "Esper Suit Control Device" obtained through certain special channels. For Minato Tsubaki, who has developed a massive dependency on her skin-tight suit to control her powers, the effects of using the control device were truly spectacular! To think she'd even burn off her own right arm—how pathetic. While she was still dazed and speechless with terror, we quickly injected her with esper suppressants and rushed her to the lab. After the fire on Minato Tsubaki was extinguished, her stone arm—a precious esper specimen—had been burnt away. The researchers couldn't help but knit their brows in regret. Afterward, her body was restrained and a mask was fitted. Only a tiny fragment of her right arm remained after the fire was out; to prevent any psychic rampages from that stump, it was injected with a massive dose of suppressants.

...A long time has passed since then. This wretched brat burned so many of our comrades to death. We are all filled with resentment toward her. Now, let's see just how much longer she can hold out.

Minato intended to keep enduring this gruesome torture. To extract her ability-nerves, the researchers further amputated her already mangled arms. To prevent any escape, they also severed both of her legs. For their research, the body of an esper is an essential subject; the disassembled limbs are mostly preserved, while the remaining head and torso, once the torture concludes, are processed into living fleshlights for the organization's members to use. When the body is used until it breaks and is no longer of any use, the brain is extracted and the rest discarded. The extracted brain will then be utilized by the organization as a biological device. Perhaps in a desperate attempt to deny that hopeless future, Minato refused to stop her usual stream of insults, even after her limbs were cut off.

「Hey, hey, what's wrong? Since you've already become a human fleshlight, hurry up and tighten that cunt for me.」 「If this pussy of yours has no utility value, I'll just strangle you to death.」 「Eeeee-heh! You damn small-fry! Pieces of shit like you are no match for us Synapse! Go to hell, all of you!」 「...Honestly, we can't torture any intel out of her; what a stubborn brat. It's about time we sent her to the Doctor.」 「Guh... aaaah! If you want to apologize, do it now...! If you apologize now, I might let you die comfortably...!」 「Yeah, yeah, sure.」

After she spills
everything, take her

The following is the character
completion for Minato.

First up—Mina
Tsubakigi, the Puller.

With formidable pyrokinesis abilities, she wields explosive flames in the direction she points! She belongs to the elite organization 'Synapse' as their youngest agent. Possessing powerful ignition abilities in both hands, she can unleash bursts of flame wherever she directs them. Though gifted with rare talent, she's an arrogant and overconfident individual who looks down on everyone—enemies and allies alike—refusing to acknowledge anyone but herself. Since her abilities are tied to her hands, she's rendered powerless if both are restrained. Additionally, her powers are amplified by her agent suit—without it, her flames weaken to a manageable level.

She consistently maintains the top grades in school, but because she's arrogant about it, those around her find her obnoxious. She acts high-and-mighty even toward teachers, but since she uses her title as a national agent as a shield, the school turns a blind eye to her behavior. Although she has many female followers, they only see the wealthy Minato as a meal ticket, and she has zero actual popularity. Her conduct is atrocious; she enjoys seducing and toying with older men. Her lavish lifestyle is funded by the financial support she receives from the many men she has beguiled.

Since the school is located on a mega-float city in the South Seas, the uniforms are made of breathable material suited for the climate. Underwear is also school-mandated. Following a past incident where a female student's powers went out of control and caused numerous deaths on campus, all students with abilities are, in principle, required to wear power-suppressing bracelets while on school grounds.

Yaji, trapped by a criminal organization that deals in human trafficking, drugged and stripped of freedom, is placed on the operating table to undergo processing as merchandise. 'Come on, come on, Minato-chan, smile! Photos have to be taken with a proper smile! And don't forget the peace sign—you won't get another chance to do it again!!!'

This individual once made a massive contribution to ensuring the safety of a vast number of special individuals, such as the Synapse members. Now, the time has come to bid this individual farewell. The surviving remnants of the Synapse organization will witness the recorded footage of her final moments, as her brain is extracted from her head while her body is simultaneously dissolved and disposed of by tentacles. By now, she likely cannot even identify what she is, nor understand how she is being processed. Even in the final moments of her life, she continues to provide us with value.

Individuals who have lost their utility are submerged in the tentacle pool to be eventually dissolved as a final disposal. The tentacle pool absorbs all matter as nutrients. Individuals who have been tormented by previous processing can be disposed of here without leaving a single trace. For example, this individual with the ability to generate flames. Her superpower carries a high risk of running amok. Although her arms have already been severed and she has been repeatedly administered large doses of inhibitory drugs, this method of disposal was chosen just to be safe.

Shijo Karin (16) (Height 155cm B104 W52 H95) A psychic affiliated with the superpowered organization "Synapse." She can accumulate massive amounts of electricity in her thighs and freely manipulate it. She can use electricity to propel muscle movement for high-speed mobility, and she can use currents to destroy enemy security systems, enabling covert operations. She can also fire lightning at targets or touch objects with her feet to deliver high-voltage currents that directly electrocute and burn enemies to death, making this a highly lethal ability. As the only daughter of the wealthy Shijo Temple conglomerate, due to this connection and her own willingness to carry out orders under the justification of legally killing criminals, she became a member of the organization. She is a sadist who loves using her powers to vent her emotions and particularly enjoys the smell of enemies scorched by electricity after being killed. Since her feet discharge electricity and melt her shoes, she operates barefoot during missions. She has a good relationship with her cousin Kudo Hina, and both share sadistic tendencies. She has always viewed the efficient enemy-burning ability of the psychic Shiimoku So as a rival. When she received the order to rescue the imprisoned So, she gladly accepted, thinking it would allow her to do the other a huge favor, and thus boldly infiltrated...

Ah...

Eh..

Hika or Yuuha, who came in with me, should be arriving soon to save me...

P-P-Please... don't kill me. I'll do anything you want.

Endure it, Karin... No matter what it takes, no matter how I have to do it! I have to buy time...

Money... If money's what you want, I'll give it to you. My family... has plenty of it.

Hurry, everyone... Please notice what's happening to me.

Everything you've taken from me, I'll take back. And then I'll kill every last one of you.

Thank you for sparing my life.

Don't worry, I won't kill you. (Not right now, anyway.)

After all, there's no way to block your electric shocks, so I used nanomachines scattered in the air and on the ground to create a path that diverts the current. It's the same principle behind lightning taking a zigzag shape.

At first, I was half doubting it myself. But after putting it into practice and turning that damn brat into a human punching bag, I changed my mind.

You... you shouldn't have access to this kind of technology... Could it be that Hiro—

Oh my, what's wrong?
Looks like nobody's
coming to save you
after all, is that it? Oh,
the processing room
that was occupied until
just now seems to be
empty. Since it doesn't
look like anyone's
coming for you
anyway, I think I'll go
ahead and process you
into a fine little sow.

Augh... guh...
Someone save
me... Tachibana...
Sayuri... Ahh,
Asuka... Why...
haven't you come
yet...

Ngh... ahhh... How dare
you... How dare you do...
do such things to my
body... I... I'll kill you!
Once I'm able to use my
ability, you lowly vermin...
I'm going to kill you all...
Ah, no! No, I'm going, I'm
cumming, I'm cumming!

Aaaah... Ugh... This can't be real... Minato... She's actually become an idiot... Everyone has turned into such unsightly slabs of meat... No, no, no! I don't want to become an ugly piece of livestock like them! Help! Someone, please save me!

Hey—this sow named Minato that you said you wanted to rescue, this is her, right? She's already been processed by us. After the treatment, there's barely any of her brain left.

How can this... Ah, I'm cumming! I am the daughter of the Shijo family... To do this to me... I'm cumming! Turning me into a fleshlight just like Minato... A pig... Awooo! Doing this to me... I'm cumming! I'll never forgive you for this... Ah, I'm cumming... Ah! SOW ORGASM, I'M CUMMING!

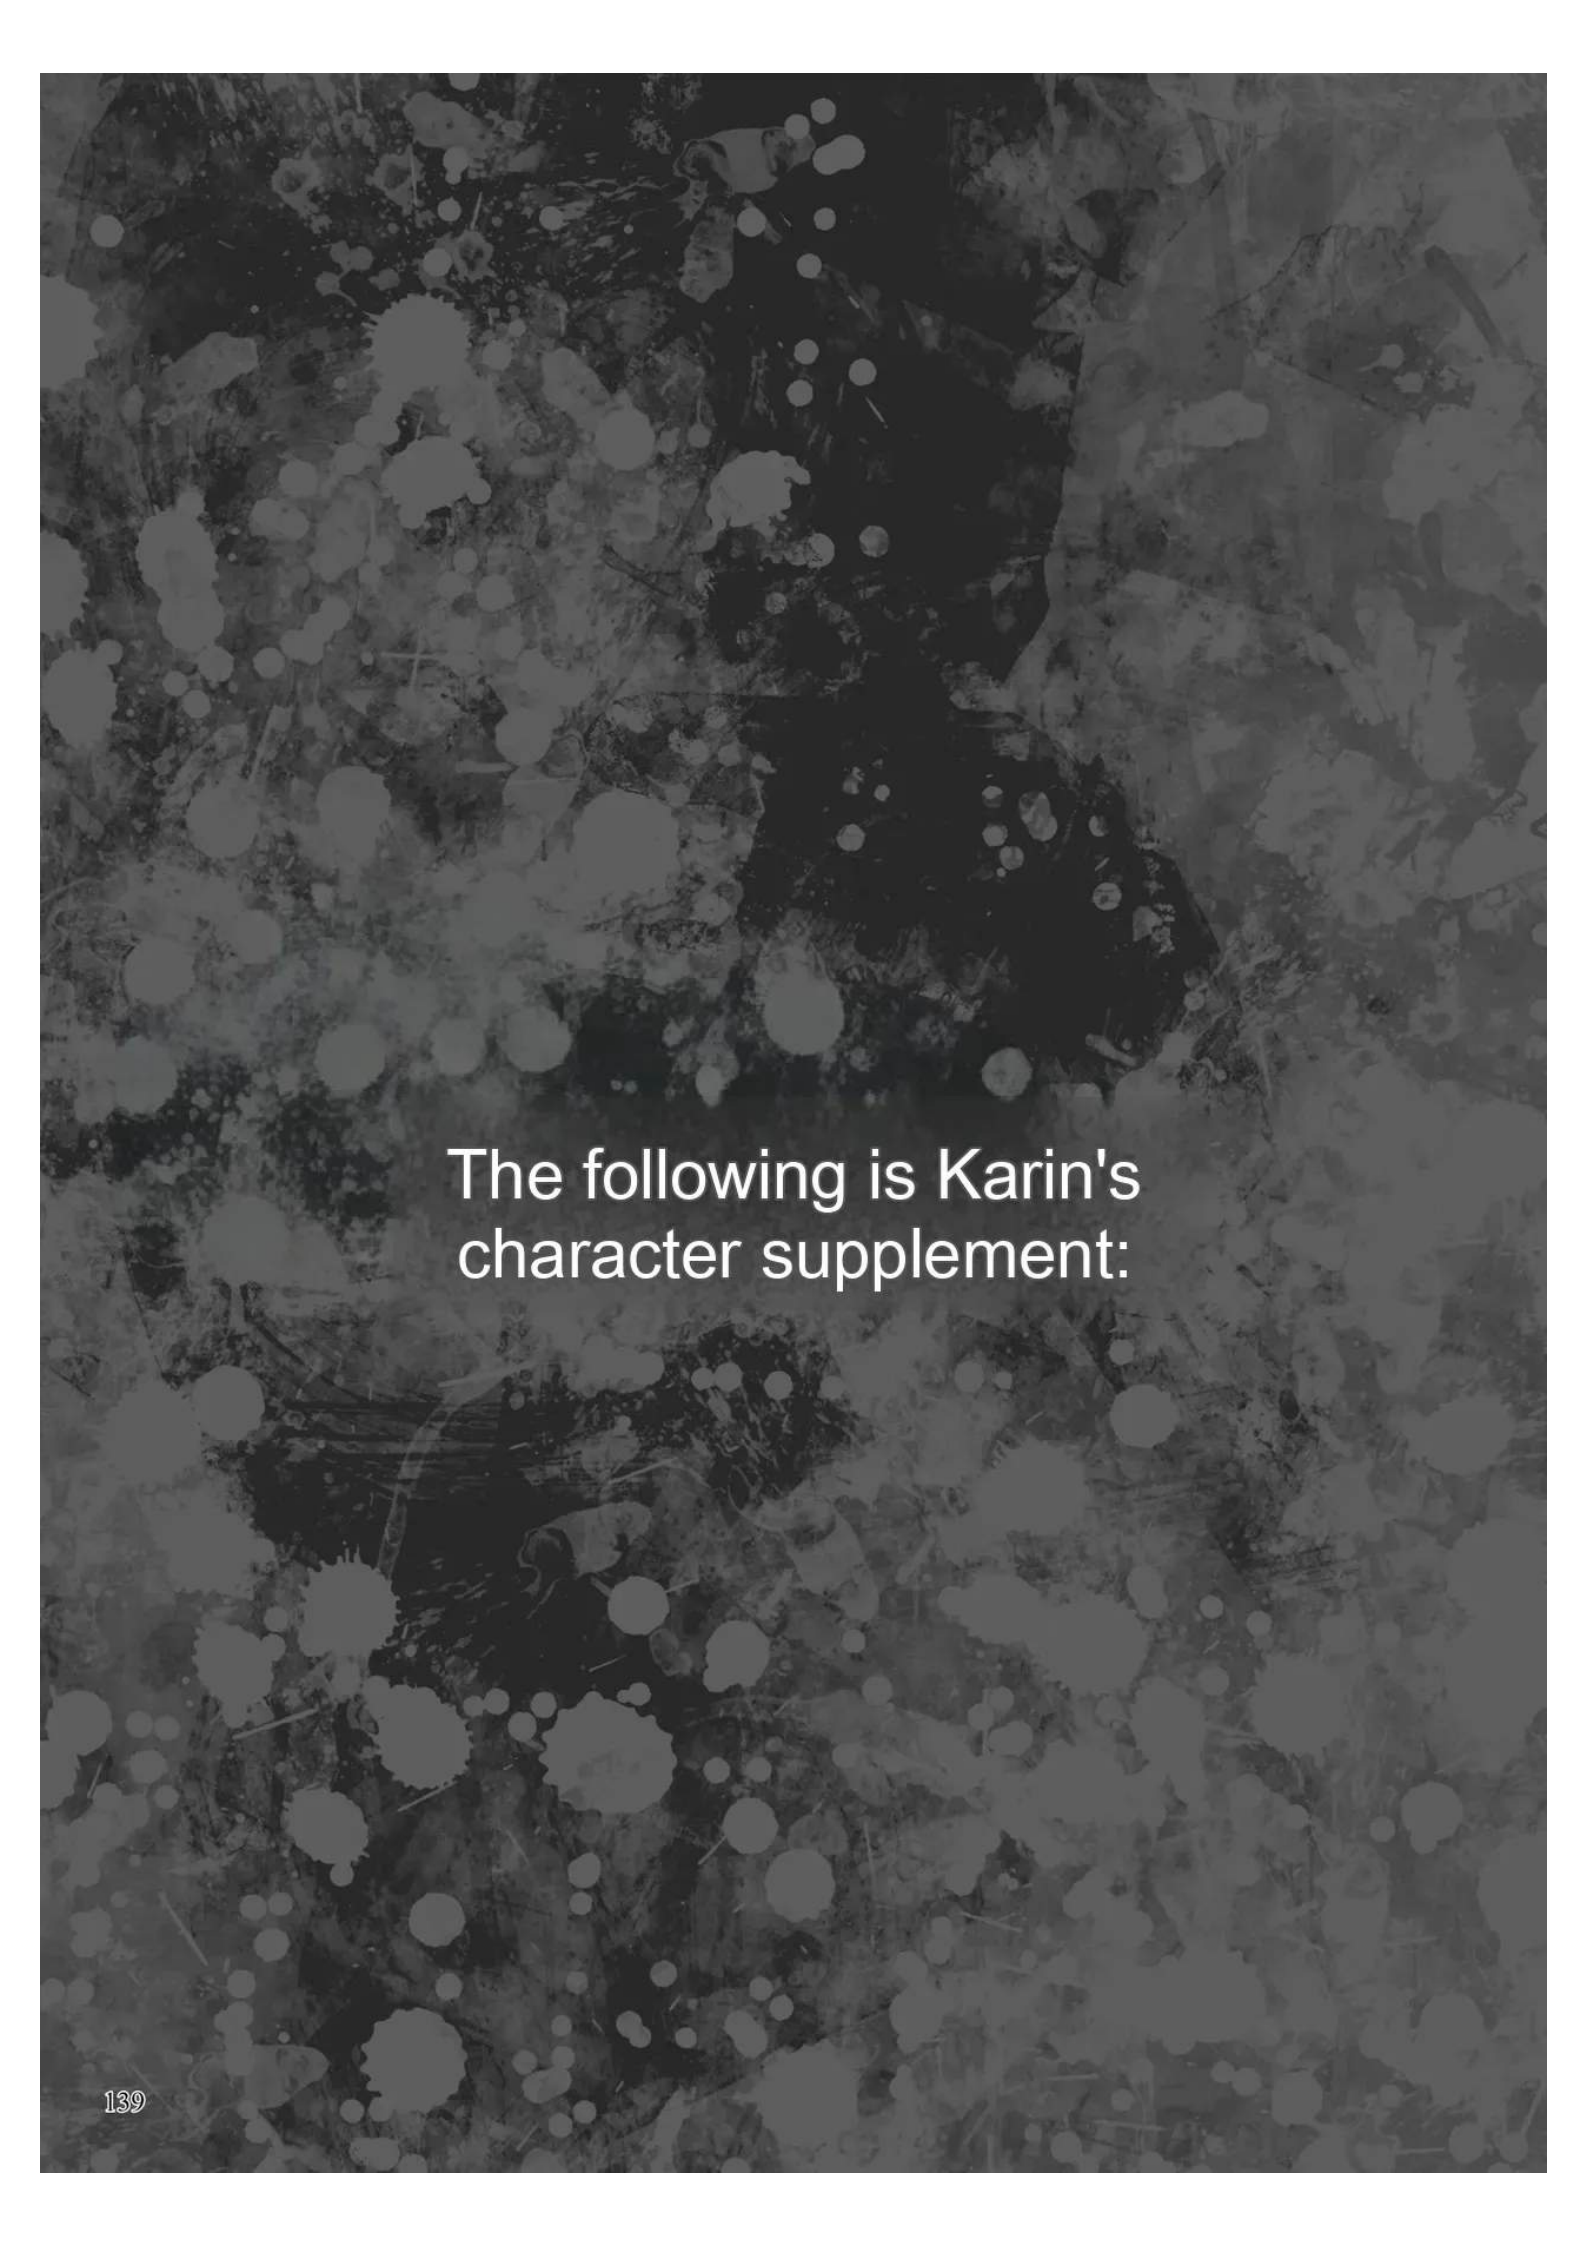

Who else is going to come here to save you? All the friends who came to your rescue are already hanging right there. And every single one of them looks so happy. Oh, that's right, your brain hasn't been processed yet, has it? You've simply been turned into a Daruma doll, yet your nipples are erect and you won't stop squirting and climaxing. You're just a hopeless masochistic sow. Don't worry, we'll process you soon. We'll scoop out part of your brain so you can become a splendid sow just like the rest of them~

Thank you so much.
I was feeling pretty
lonely after getting
separated from my
seniors... but now,
for Master's sake, I'll
do my best to
become a wonderful
lump of meat.

Hmm? You're still
looking up to this sow?
If she stays alive, we
can squeeze a ransom
out of the Shijoji family,
so the plan is to take
out only 40% of her
brain instead of all of it.
But you're different;
you're scheduled to be
sold as a processed
product, so it's already
been decided that your
whole brain will be
removed. Mako-ni.

Haaah, this is incredible... Even the
strong, cool Shijoji-senpai has fallen
into the hands of guys like me. Are
you going to get killed by these lowlife
pigs too, Senpai? Are you going to be
turned into a slab of human meat like
me?

The following is Karin's
character supplement:

井

Nnnnooh♥"

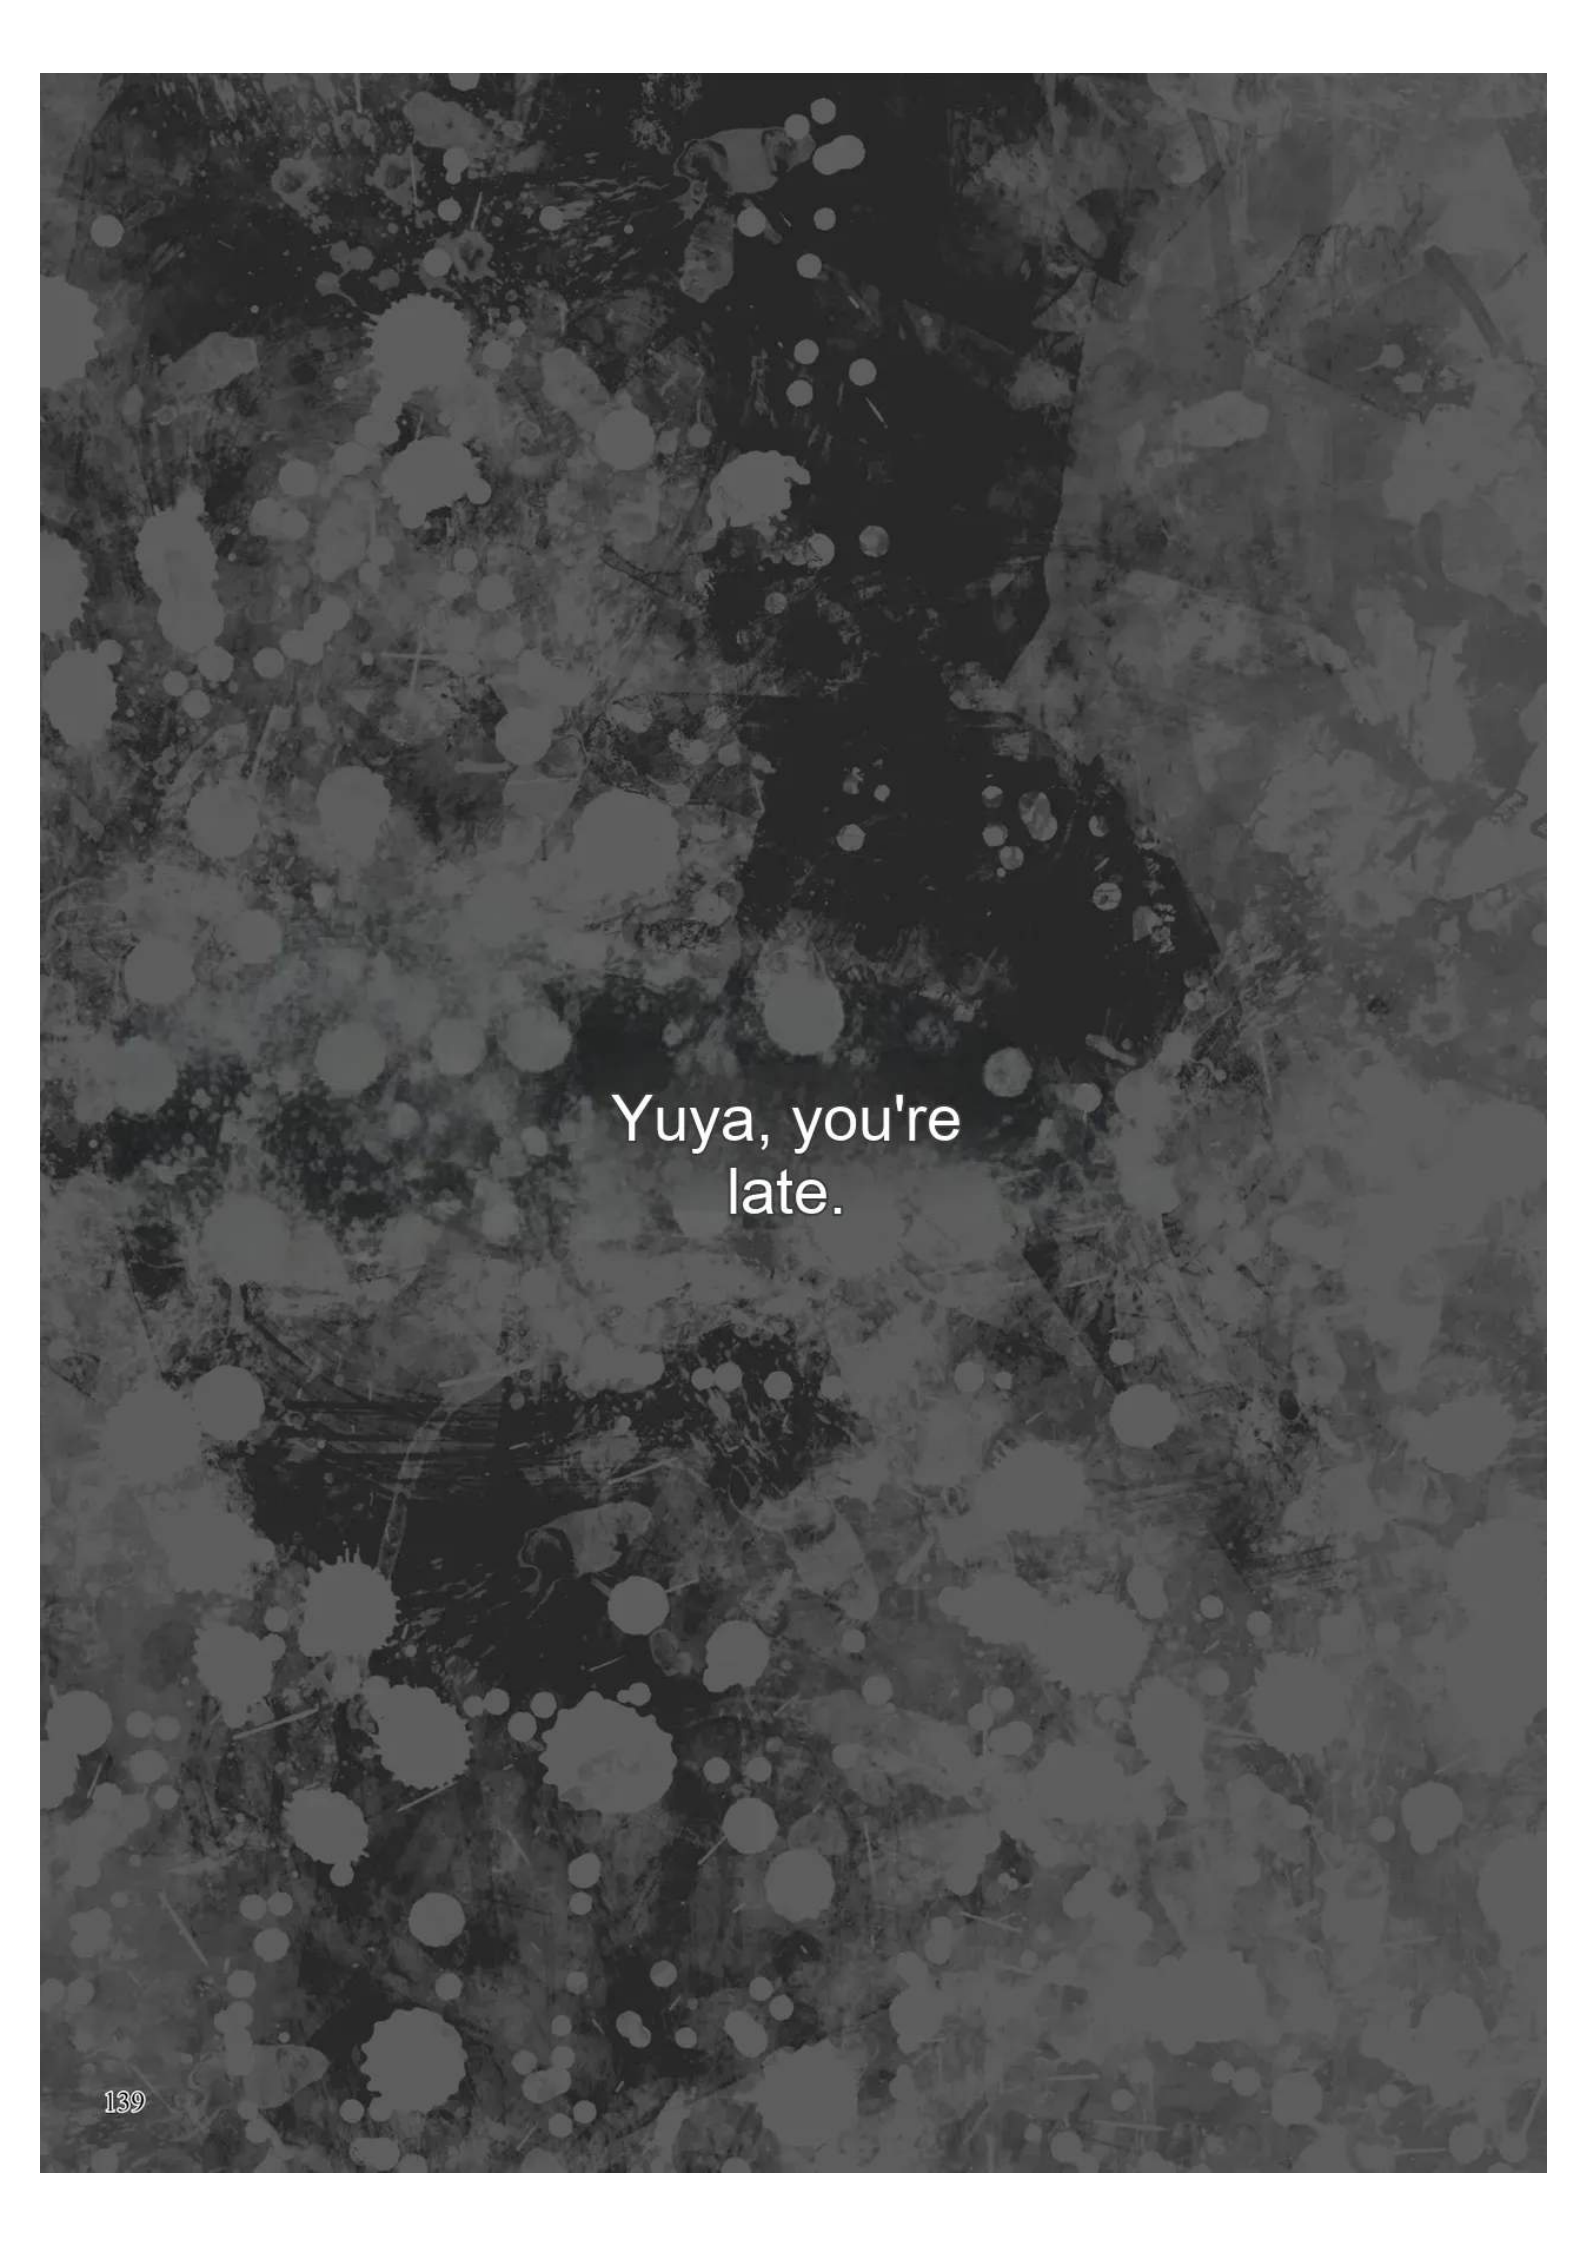

"Don't die on me from something like this. I'm gonna suck out every bit of your brain, you bastard."

I've squeezed all the info I could out of him, so now I'll just use him up as a biological device.

You should be grateful they're hooking up that pathetic excuse for a brain.

Yuya, you're

Turning those
hideous men

them is my
absolute
favorite ♡

Asuka Michi (14) Height: 146 cm B69 W51 H72. Her "Medusa Eyes," enhanced by Synapse's technological power, can turn any living creature she sees to stone. She is a Special A-rank esper (and a lesbian sadist pervert). She has an intense hatred of men and wants to wipe them all from the face of the earth. As a result, in battle, she recklessly drags in male civilians who aren't even part of the enemy forces. (In fact, she actively tries to maximize the collateral damage.) She is Karin Shijoji's cousin. Since her build is so slight compared to Karin's, she suffers from a severe inferiority complex. In particular, if anyone mentions her chest, she will petrify them without hesitation. This time, she's joined the infiltration mission into the enemy organization as part of the Minato Tsubaki rescue team alongside Karin. Asuka sees this as the perfect chance to show how much stronger she is than the others and boost her standing within the organization.

Every last one of you, turn to stone!

Fragile, foolish, and overestimating yourselves!

No matter how many of you come, I'll win. How many times do I have to teach you brainless muscle-heads before you learn your lesson?

Ha. These lowly monkeys are gathering one after another. How filthy...

That's why I said you should have just left this infiltration mission to me from the start.

It's such a pain that I have extra work to do all because of those useless pig teammates' blunders.

Well..

Gya h-p u!

Those anti-esper goggles from the black market really work well. Now then, let's pluck out those dangerous eyeballs.

Eh?
Eh?
Eh?

That's a nice sound. Three ribs broken. Are you climaxing yet?

Don't think you'll die easily. For the sake of the comrades you killed, we'll take our sweet time settling this debt with you.

I can't see...
Ahh...

It hurts
...

What's wrong?
This self-proclaimed Synapse elite—why don't you show off that proud psychic power of yours? Let us have a good look.

I won't resist anymore, so please... please stop cutting off my limbs... I'm begging you, give me back my eyes....!!

I'm sorry,
I'm sorry,
I'm sorry,
I'm sorry...!

Oh my, that little waist is swaying quite energetically. As expected of a young brat's body. And the fit of that little hole is quite excellent, too.

The tight little pussy of this young esper girl is wrapped snugly around my cock—what a unique pleasure. Ahh, I'm gonna cum, I'm gonna cum!

A few days later...

Anyone whose pussy gets loose is getting tossed into that shredder over there. Prepare yourselves.

Since the higher-ups have already finished extracting data from you, you have absolutely no value left now other than being toilets.

Ah-h a! ♡

As if I'd ever forgive you, idiot. Your annoying arms and legs have been removed—now you're a freshly made human fleshlight, pumped full of aphrodisiacs!

If I hit the sides of your belly a few more times, the walls of your cunt tighten right up... it feels so damn good.

Ah...

Ngh, get pregnant, get pregnant, get pregnant!

Ngh, guhh, I'm gonna cum again! Hurry up and get pregnant to pay for your sins, you brat!

H-Hyah... i-it
hurts...

Hey, hey, hey, you can
kick them a few times,
but don't kill them. If
you kill them, you'll
become a murderous
criminal just like them.
We have to keep them
alive so they can
properly atone for their
crimes.

Aah!

You murderous
little brats... do
you have any
idea how many
of our
comrades you
two have
killed?

That's a great idea. That way,
those two can survive as
human sandbags for hundreds
or even thousands of years.
Life is precious, after all. Aren't
we being a bit too merciful?

using it on these
two for a synthesis

Kuki Yūjin (17) Height 169cm, Weight 63kg, B108 W60 H92. A member of the esper organization 'Synapse.' Her ability allows her to generate an infinite number of blades from airborne particles or iron sand she carries. She can wield these blades for slashing attacks, telekinetically launch them as projectiles, or use them as defensive shields—making it an extremely versatile ability with pure destructive power. The source of her esper ability is brainwaves. To prevent the danger of her brainwaves going berserk from excessive output, she wears a hair ornament-type control device. She comes from a distinguished martial arts family and is the only daughter. Her family has produced prominent figures in the military and police organizations for generations, and she herself is a refined person well-versed in both literary and military arts... But this is all a facade she puts on. In reality, she views non-espers as an inferior species, something evident in the subtle details of her everyday words and actions. Her formidable combat abilities are the result of training since childhood. Her swordsmanship skills are also exceptional. During an operation, her control device was hacked by the enemy, causing her limbs to be severed by blades generated by her own ability. She was also taken prisoner by the enemy.

It's almost embarrassing for me to cut down these powerless opponents one-sidedly, but I, Yuto Kuki, show no mercy—

Hmph... To think Karin, who moved first, couldn't even handle an inferior human like this?

For years, she fought on the front lines thanks to her regenerative abilities, and as a result, she's become numb to pain. On top of that, she takes pleasure in getting hurt, having developed a serious masochistic fetish. She used to be a soldier who specialized in using her regenerative powers alongside firearms, hand-to-hand combat, and weapons. More recently, she's taken a mischievous liking to carrying bombs around. She gets along well with Sayuri, who's in the same unit, and the two are almost always together, both on and off duty. After Tsubaki Minato was captured by a rival organization, she joined the rescue mission. Tachibana (real name unknown). Age unknown (her body stopped aging the moment her powers manifested). Member of the esper organization "Synapse." Before that, she belonged to the military of a certain country. After that country was defeated and surrendered, the military was disbanded, and Synapse recruited her. She has super-regenerative abilities; wounds from bullets, for example, heal within seconds. Her power is close to immortality, and there are even rumors that if her head were cut off, a new body would grow from it.

Why don't we test if new tits grow back after we slice these ones off?

an individual with extremely strong
masochistic tendencies, No. 108
currently remains in a state of
relative euphoria. This concludes
the experimental report from the
dismemberment operator.

Furthermore, this berserk
state can be utilized. In
response to this situation, a
development project
regarding
growth-promotion abilities
has already begun. Thus, it
is concluded that No. 108
still possesses extremely
high utility value.

Additionally, the plan
to produce large
quantities of feed in a
short time has proven
feasible. It has been
confirmed that a
massive amount of

During the experimental process, an
unexpected byproduct was created.
By forcing the brain and body to
repeatedly regenerate severed parts
in a short period, the regenerative
ability entered a state similar to a
berserk mode. The regenerated
severed parts have begun to show a
tendency toward gradual
hypertrophy.

Chapter 3: Magical Girl

Height: 153 cm, Weight: 55 kg, Bust: 91 cm, Waist: 59 cm, Hips: 90 cm. Ryoma Kishino (16) is a member of the superhuman organization "Synapse." Her ability lets her absorb physical blows and store that energy, turning it into attacks. The rapid-fire strikes she unleashes with that absorbed energy can easily smash reinforced concrete structures. In battle, she craves the thrill and excitement of a game. For criminals, delinquent gangs, and violent groups, she dishes out vigilante justice to satisfy her own urges—it was during this process that "Synapse" discovered her. Ryoma also trains in ancient martial arts and has mastered a variety of combat techniques. She learned these techniques while searching for ways to more efficiently damage the human body. Like Yu Ren, she is a psychic who fights on the front lines. As they often fought together while searching for the missing Yu Ren, they uncovered a criminal organization's weapons-trafficking operation. During the crackdown, she was hit by a powerful adhesive projectile, which sealed away her ability to absorb impacts and led to her capture by the enemy.

A psychic girl belonging to the
'Psychic Organization: Synapse'

Kidnapped as a young child, she was sent to a psychic research institute in a certain country, where she was subjected to numerous inhumane human experiments as a test subject. For several years, she has been used as a humanoid weapon by that country's military. Her ability is pure psychokinesis, but its power is so high that she can even slice through the hull of a tank. Due to the various experiments, she seems to have a screw loose and is mentally unstable. While she has a cheerful and free-spirited personality, she is also extremely cruel, finding her greatest pleasure in severing the limbs of strong soldiers on the battlefield and turning them into lumps of meat. She got along well with Tachibana, who belonged to the same military unit, and they often acted together.

Though she always acted like a total sadist, after seeing footage in the military archives of psychic girls with their limbs severed and brutally violated like breeding sows, a deep, uncontrollable urge for masochism began to smolder within her. One day, she suddenly destroyed the research institute and deserted the military. She spent her days idling in the streets, occasionally killing people for fun on a whim. Later, she was scouted and recruited into the organization by Tachibana, who had already become a member of Synapse, and the two became psychic comrades once again. She also participated in the operation to rescue Minato Tsubaki.

"That masochist... I knew she'd betray us sooner or later..." Seeing Tachibana's vacant expression on the monitor—her limbs severed, being violated like a fleshlight—Sayuri's breasts and clitoris throbbed at the

While one-sidedly slaughtering the organization's combatants and enhanced humans, Sayuri advanced deeper into the massive facility. Through the internal surveillance system, she learned that Tachibana had already surrendered to the organization.

到了疼痛。

Aha... I won't surrender as easily as she did!" As Sayuri channeled her psychokinetic power into her fingertips, the combatants simultaneously readied their PK Reflectors. "To stand your ground against me without flinching, you've got some nerve! Any of you pigs who want to be toyed with, step right up!

Sayuri heard footsteps and turned to find herself surrounded by the organization's combatants. Since none of them were a match for her individually, they had brought the latest PK Reflectors this time. "Ahaha... now I'm really in a bind..." The image of Tachibana as a living "daruma" doll flashed through her mind, and her clitoris grew hard and erect in response.

My screams echo continuously deep within the organization's basement. The PK reflector bounced my own psychokinetic power back at me, severing my arms and legs.

- Maiko's doll collection is usually
used to handle her daily chores.
Her esper ability is best suited for
controlling dolls or puppets. She
has no combat capability.

Nishinomiya Maiko (17). A member of the esper organization "Synapse." She can inject her spirit into others or inorganic objects, allowing her to manipulate them freely. When controlling inorganic objects, her own consciousness remains intact, enabling independent operation. This ability allows her to infiltrate enemy lines and gather intelligence without significant risk. Personality-wise, she finds everything a hassle. Using her powers in daily life is second nature to her, and she hates being given orders for chores, usually forcing others to do troublesome tasks for her. Even during dangerous missions, she will use her ability on fellow Synapse members, treating them like disposable pawns. Because her ability affects both her own and others' spirits, her brain accumulates fatigue easily, so she loves to sleep. She considers rear-support a dream job because it allows her to slack off and nap at the base. Her outfit is a dress style; since she rarely goes to the front lines and mostly acts as support, her fashion taste differs greatly from Minato and Karin.

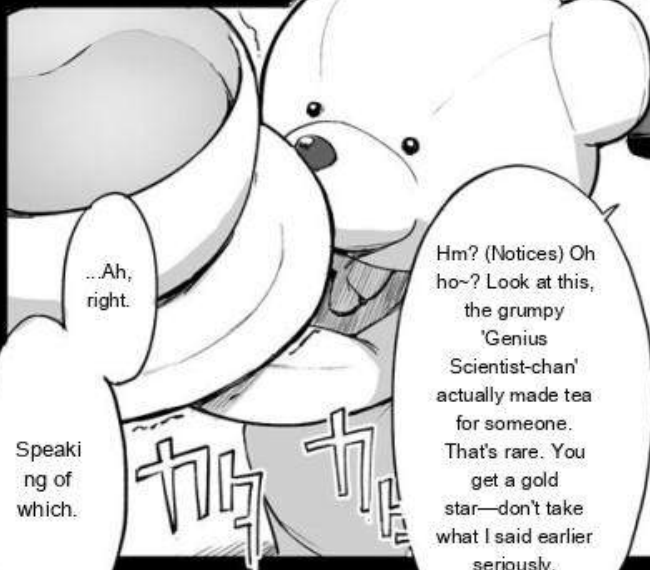

Being busy just means work's important. For someone like you, who can handle missions remotely without taking any risks, working is only natural. If you were as lazy as usual, you'd be useless right now.

Here's your tea.

What a pain—all this crap is piled on me because of that idiot Minato... Everyone's out on rescue missions, so the org's seriously short-staffed right now~

Psychic powers that act upon the mind are precious research subjects. Maiko and the Deputy Director will spend the rest of their lives in the laboratory as experimental samples for research. Even in this situation, the two of them have never given up on confirming their love for one another. Furthermore, the physical body left behind after the spirit has been separated is still capable of pregnancy and childbirth. "And there is a possibility they will give birth to individuals with similar psychic abilities. Thus, the researchers have them engage in continuous, repeated mating. Maiko will have to watch the sight of her own miserable, wretched body until the day she dies.

noooo... Literally, Maiko and the Deputy Director have become one in body and soul, their spirits whispering to each other. The physical body, now an empty shell, continuously lets out puhee-puhee pig squeals as if mocking the despairing Maiko, drowning in pleasure. The soulless husk of a body is on the verge of falling into total depravity.

Maiko possesses the psychic ability to intervene in the minds of others with her own consciousness. Through a special device, Maiko's spirit was connected to the Deputy Director's brain! "And so, her spirit was forcibly integrated into the Deputy Director's mind. [When she opened her eyes, what she saw was her own miserable, wretched form with both arms and legs severed. Hikari Takijima

Chief Takijima!? I can't believe it. The Chief of Synapse, the one who discovered my special ability and to whom I owe so much, would be... [Adult Content: No viewing under 18] A cheerful, innocent mood-maker. After losing his parents to an organization hostile to Synapse, he shows no mercy to its members. He calls the Chief "Pa" and feels deep affection for him. His ability lets him absorb sunlight through his eyes, amplify it inside his body, and fire it back as beams from his eyes or fingertips. Those beams are incredibly powerful, but he has to absorb sunlight through his eyes first, so he can only use the ability in places where sunlight reaches him. On top of that, while the ability is active, his eyes become vulnerable to the influence of all light sources other than sunlight.

Hikari Takishima (16) was originally an orphan. After demonstrating her supernatural talents, she was recruited into the Synapse organization by its director. She also had a younger sister who was a fellow orphan. Her ability allows her to collect light through her pupils, store it in her body, and then amplify/convert that accumulated energy into light beams fired from her eyes or fingertips to attack enemies.

Hikari infiltrated the enemy's base to gather intelligence in order to rescue her comrades.

Unfortunately, she encountered the enemy and suffered a crushing defeat in battle. Because the enemy deemed her abilities dangerous, they amputated her limbs, robbed her of her sight, and fitted her with a brainwashing device to slowly alter her mind.

Ultimately, she was processed into a dairy cow that sprays breast milk without a moment's rest.

Humans turned into livestock have shortened lifespans. Once an individual's value as a dairy cow has been squeezed dry, they are ultimately sold off as meat products. The day when these massive breasts are served on a dinner table is likely not far off.

Deprived of sight and with her brain thoroughly violated, her intelligence has significantly regressed. She spends her miserable days as livestock, being milked incessantly while trapped in a state of continuous climax.

Shiori Takishima

14 years old. A member of the ability-user organization "Synapse." She comes from the same orphanage as Hikari, and both were adopted by Director Takishima. She respects Director Takishima not only as a father but as the head of the organization; she shows blatant disgust and hostility toward anyone who opposes him, even if they are allies. Her ability is psychokinesis over liquids, allowing her to freely manipulate any liquid within her line of sight. By controlling liquids and forcing them into a living being's lungs, she can easily drown them even on dry land. Despite her small stature, her physical abilities are extremely high, and she specializes in VIP assassinations and infiltration. She has a calm personality that is the polar opposite of Hikari's, yet the sisters get along well.

However, she is also jealous of how clingy Hikari is with Director Takishima and possesses a strong desire to have him all to herself.

Emily Mami

Fumimi Futau is a member of the special-abilities organization "Synapse." She possesses the special ability "Charm," which acts on the brains of living beings and induces a hypnotic state. While she can hypnotize targets regardless of gender, the ability is more effective on members of the opposite sex. There are many mysteries surrounding this hypnotic ability, and it remains unclear exactly how it induces a hypnotic state in the target's brain. Since special abilities are closely linked to the user's brain, researchers are especially interested in whether hypnotic abilities—which affect the target's brain—have a deeper connection to the user's brain than other special abilities.

Arrogant and greedy by nature, she sees everyone but herself as nothing more than tools. She judges people by how useful they are and has toyed with countless men using her special abilities. She calls men she deems "useful" "pigs" and takes pleasure in forcing them to kneel before her. She is a sadist who deliberately keeps her hypnosis shallow with defiant "pigs," slowly breaking them down until they submit. [Because her special abilities affect all living creatures, she is assigned a mission to infiltrate a biological research facility developing biological weapons and heads to the enemy organization's laboratory.]

A high-pitched motor sound could be heard from above. Even facing the end of her life as a human being, Milya groaned, wrinkling her brow defiantly. From now on, she would work for the sake of the world and its people more than ever before.

Restrained in a torture chair, Milya was like meat on a chopping block. As her head was stroked, she was given a polite and thorough explanation of what was about to be done to her.

Individuals with powerful supernatural abilities are valuable research materials. Both Mir and Milya, who were active as the youngest "Caution" in Coloron and the youngest agent in Neuron respectively, were treated as precious, high-quality specimens. Although the torture was ostensibly to extract information about Neuron, the researchers were more excited to swarm around the restrained Milya to unravel the mysteries of her abilities. To a researcher, the brain of a powerful ability user is a mass of divine mystery.

Ability users with no research value are tossed in here as biological material. A special chemical is injected directly into their bodies, eventually erasing their minds and turning them into biological material, right down to the marrow of their bones.

The artificial tentacles, developed to use ability users as biological material, are designed to wring out every last bit of energy they have.

Milia Sakuragi (11) is a member of "Neuron," an esper organization that stands as a rival to the Synapse organization. She can manipulate wind, and her ability is ranked as the highest level within the entire organization. A few months before the collapse of Synapse, she went on a mission to suppress criminals. She went missing shortly after. The enemy extracted a vast amount of valuable information from her brain. This provided immense help in the subsequent mass capture of espers.

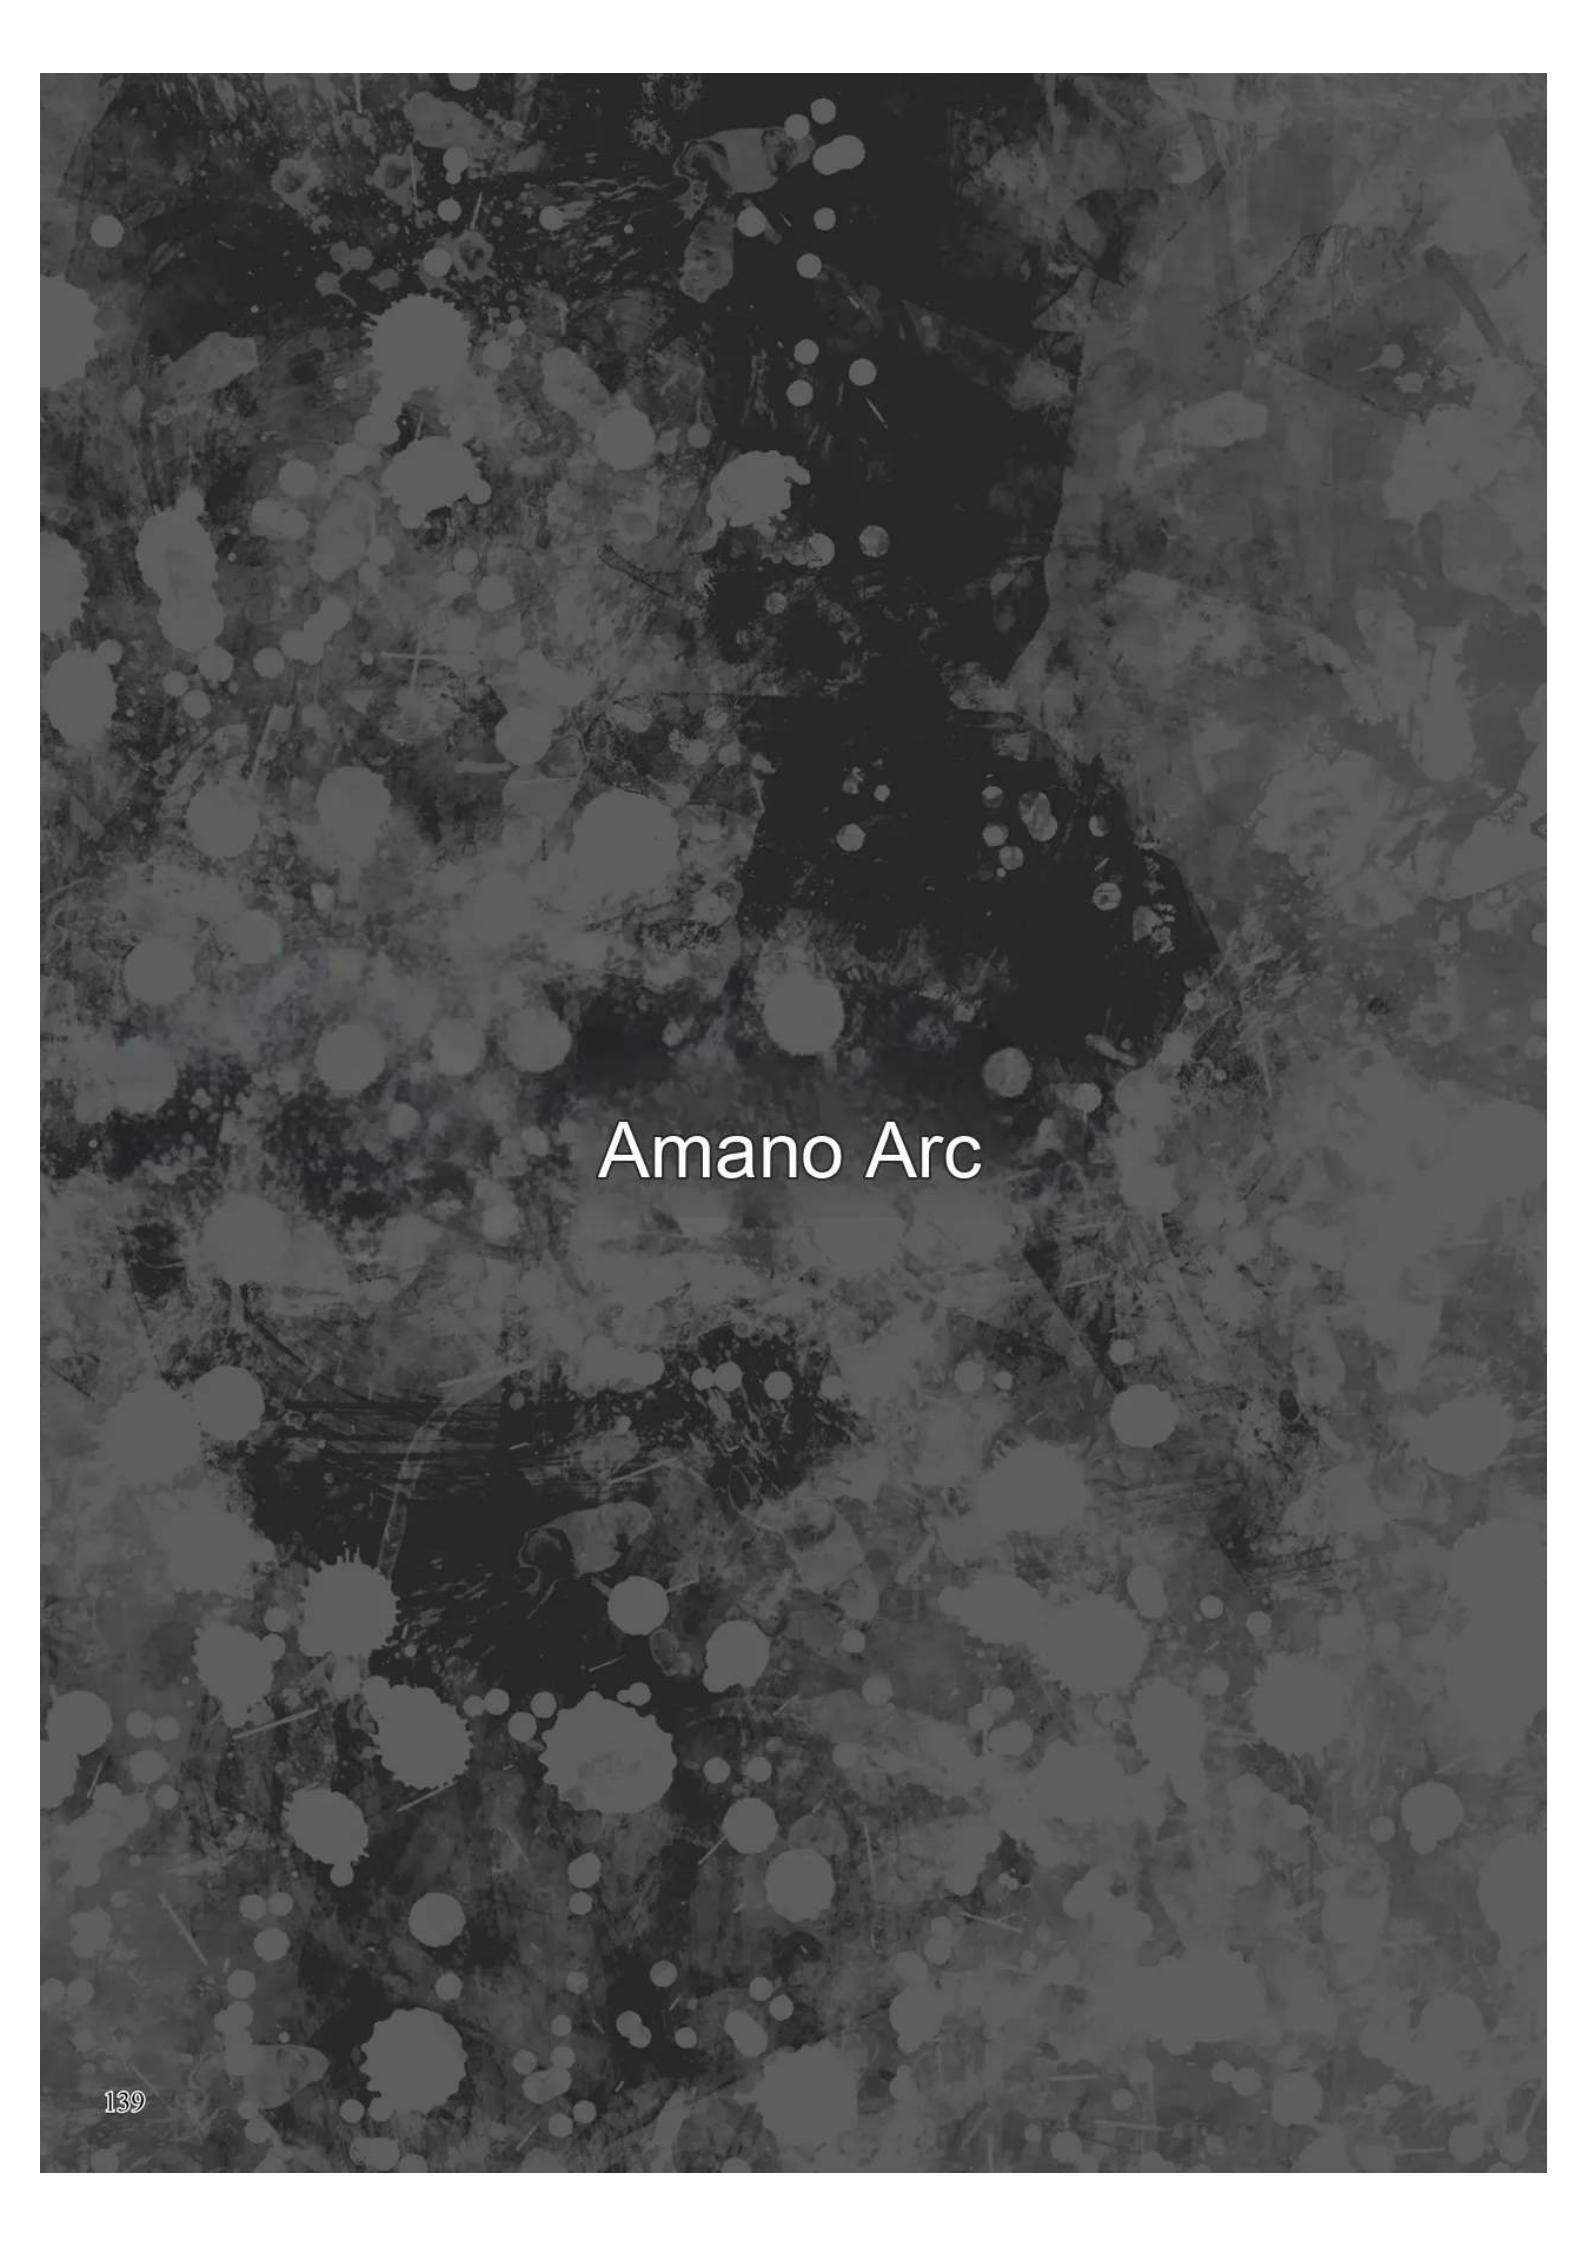

Welcome to the server room. This is the heart of our organization's esper research... And this is our latest biological equipment. While other biological units have been measured with strong abilities, their performance was still insufficient. But she is different; her performance is truly exceptional. Excellent equipment requires a special environment, so we cannot neglect its maintenance for even a second...

# Amano Arc

Matsukawa Amai, doctor, 18 years old, height 137 cm, B121 W61 H82. Devoted to researching superpowers, she became Synapse's head of technical research at a young age. She has no special abilities; she's just an ordinary human. However, she's the world's top genius doctor in the field of esper research. The costumes and weapons used by espers all come from her designs. Because of that, she also knows the weaknesses of every esper. Since she's a genius herself, she's quite arrogant and hates stupid people. As a result, Amai, who isn't an esper herself, looks down on those low-IQ esper girls who don't use their brains and just rely on their abilities, so they get along like oil and water. She graduated from a foreign engineering university at 13, where she met Dr. Elena, now ranked second, and took her as her disciple. From a young age, she desperately drank huge amounts of milk to get taller.

\*She's very annoyed about her chest. But she doesn't regret it and still keeps drinking milk to this day, growing several centimeters a year. On top of that, her height is currently shrinking by half a centimeter every year! Her bust is growing several centimeters every year. On top of that. Her height every!

Ahhh... that idiot woman Shijoji got turned into a human meat daruma too, and she's just over there nonstop orgasming...

Hehe, how does it feel? How does it feel knowing you'll spend the rest of your life being used as a fleshlight by the very men you used to look down on?

This is amazing! Those damn bratty espers really did get processed into human meat sows.

To think... you'd be squirting with such a blissed-out look on your face... it suits you perfectly. You deserve it!

I'm cumming! I'm cumming! Squirting and peaking right along with these daruma sows! I'm cumming!

Masturbating while watching those arrogant, haughty little bitches get slaughtered is the absolute best.

I'm cumming!

You all better be grateful to me, the great Amano-sama! You arrogant esper brats were supposed to be turned into human darumas and then all painfully killed. But as a reward for the info...

As a reward giving me information, I'll skip the v this time and demand tw three of these daruma sows to keep as my own pets.

Since there are still plenty of ability users left, next I'll manipulate those men to attack the headquarters here.

Those people who used to look down on me have fallen into this literal hell, while I watch them and masturbate from a safe place. This feeling of omnipotence... I can't get enough, I'm getting addicted.

This big-breasted brat here was the mole who gave us plenty of valuable intel. Who knows what other secrets she might still have. We're extracting the brains of all the sows we caught from the Tech Development Department and processing them into human brain servers. Take them to the smoking room in order of their ID numbers. As for the other sows we caught who aren't from Tech Development... just throw them straight into the shredder.

That... that Saigawa... Saigawa...  
Ah, Director, is this sow number 1231 the one you were looking for?  
2 Ah~ It's great that we found her.  
All these others here are just useless regular employees without any psychic abilities—nothing but livestock meat. If we'd been a few hours later, their bodies would've been tossed into the shredder.

Hanging and strangulation play are wonderful, so  
I wish they'd become more popular.

The Smoking Room. In this room, unprocessed sows are hung up like hams and continuously broken until they are ripe. Since the sows have had their limbs removed, their weight is significantly reduced, so they won't be strangled to death even when hung by the neck. However, the pressure on the neck keeps the brain in a constant state of oxygen deprivation, allowing them to be broken into submissive, gentle sows in a short period of time. Unlike the meat from the arms and legs which can be sold immediately, the processing and butchering of the torso involves issues with excrement. AAAHHH!! Therefore, sows scheduled for Grade C processing or higher, are left in the smoking room for one to two weeks. During this time, they are fed only 'Living Gel' (made from the meat and bone meal of other discarded sows) to empty their digestive tracts, ensuring hygiene during the subsequent butchering.

Bu-heeee...  
I'm  
cumming,  
bu-heee,  
bu-heee!

Ha~... That's not something a sow should be saying. Your body has become like this, leaking filth and piss everywhere, a perverted masochistic sow who's climaxing every single second, and you still think you're human? No. 1231, as punishment, you'll be hanging here for another week. If you understand, answer me in pig-speak. If you make any sound other than a squeal or a moan, I'll hang you for another month. If you want to be butchered and released from this sooner, then hurry up and be a good little sow.

Please, I beg you... let me go... I... I'm a genius... I'm definitely going to win... AHHH!!... a Nobel Prize in the future, so please... don't kill me... Mmm, ngh, I'm cumming!! I'll definitely reward you... mmm, ngh... ah... if you want money, I'll give it to you... I don't even need my arms and legs anymore... I'm cumming, I'm cumming, just please, let me live, I'm cumming, AHHH!!

Puh-hee, puh-hee! Being a sow is so blissful! I'm cumming, I'm gonna cuuum!

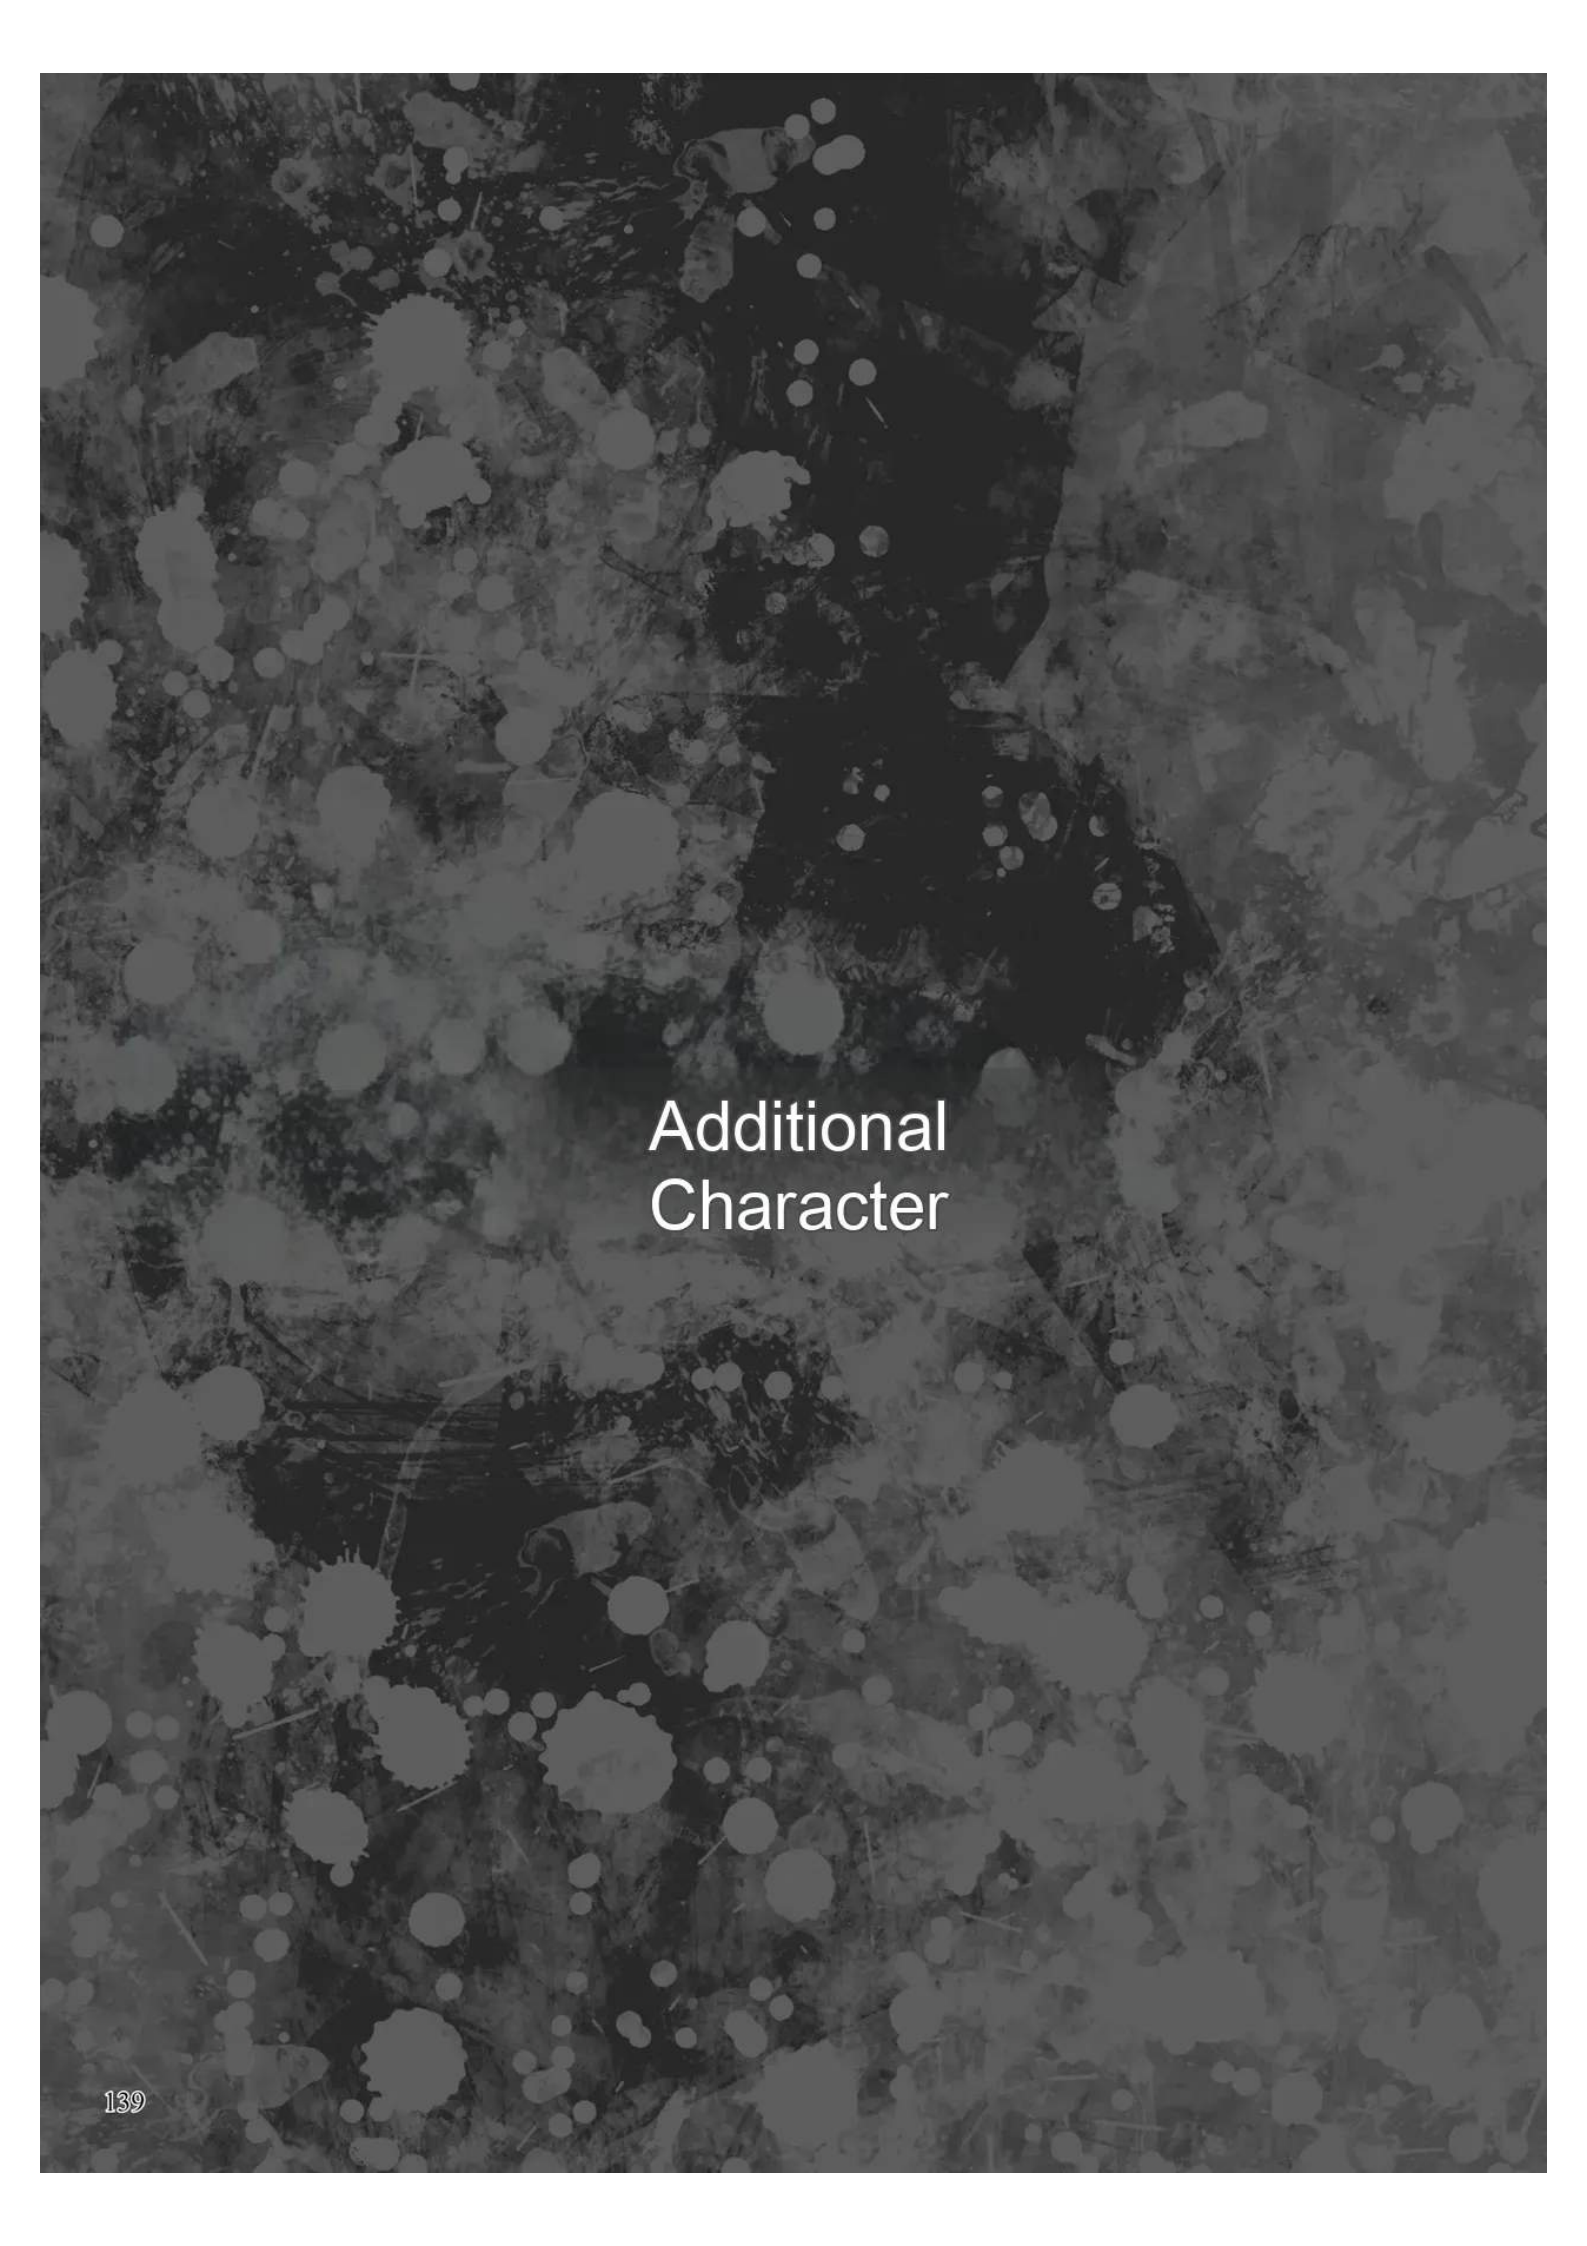

These sows are just too funny. Keeping them orgasming like this [massively increases their brain processing speed.

The data capacity of these two is enormous; it'll take about three more days to finish the transfer. You'll finally be allowed to die then, isn't that great? Are you orgasming non-stop out of joy? Your true feelings as a sow are being poured out through the electronic synthesizer without any filter. Hahaha, isn't that just adorable?] Puh-hee, puh-hee, this sow is gonna cum!

Once you're done with that blonde, fair-skinned sow beside you, toss her in the shredder. Though a bald old man from a rival academic society said he wanted an onahole... Even for someone like you, whose only selling point is your brain, he wants you without one too. What a generous customer, right? I wish you happiness for the rest of your life~ Ah, since only your body will be left, you won't exactly be dead, so maybe I shouldn't call it the rest of your life?

I'm cumming, I'm cumming! This sow is gonna cum! I'm getting fucked into an orgasm!

## Additional Character

朝月莉莉(11)

The only daughter of the benefactor of the esper organization "Synapse." Although she is an esper herself, she has no combat ability and her physical capabilities are those of an ordinary girl. Her true power lies in her womb. After an examination, Dr. Matsukawa discovered that her egg cells contain esper genetic markers, meaning any child she bears is guaranteed to possess some form of supernatural power. \*Due to this special ability, she is kept under Synapse's protection and enjoys WP (White Privilege) treatment at headquarters. Although she is arrogant, overbearing, and looks down on everyone, no one dares to defy her because she is the benefactor's daughter. All personnel involved loathe her, but she remains completely oblivious and unbothered.

Hehe, looks like your seed can only produce trash like this. Now watch me make her give birth to an SSR-rank ability!!

What the hell, another C-rank piece of garbage ability!

We're currently mass-producing superpower vessels for transplantation. We plan to increase the number of workers to 300 and run 24-hour shifts.

\*The Synapse headquarters still houses many trainee officers who serve as combatants but have not yet completed their professional training, including rookie espers and researchers. There are also many intellectual workers staying here to assist with research. Due to their inadequate armament, they were swept up by the enemy's assault force and captured in their entirety. Since these girls are still immature, there is a high possibility that individuals with latent, extremely powerful abilities exist among them. However, because they are so young, these differences are not obvious and thus impossible to distinguish. Consequently, the enemy organization's researchers can only mechanically extract information from all of them. Most of them were staying here to help with research. These pre-pubescent girls were being indoctrinated with knowledge about espers while their abilities were being scouted. There were also many overseas trainees who came for international cooperation or to promote the peaceful use of esper abilities.\*

...N-he-pu-hei-ee-pu-hei-ee! Ah... [An esper capable of telepathy and mental synchronization with others. A powerful ability that can be used without distance limits on anyone she has met at least once. However, as an immature rookie, her control is unrefined, and using her power often leads to deep synchronization with the target's psyche. Not only are memories shared, but emotions and pain are also synchronized. If the target is asleep, she falls asleep too. If the target is dead, her own heart stops. Therefore, the organization strictly forbids her from using her power without knowing the target's exact status. The moment Nozomi synchronized with Karin—who had fallen into enemy hands while trying to earn merit within the Synapse organization and had utterly devolved into a sow—her brain cells died instantly. In that single moment, she too fell and became a sow! She became unable to even masturbate unless a male owner gave her an order. Furthermore, she could no longer eat human food, making it impossible to even pretend to be human within Synapse! Just two days later, she went to surrender to the enemy along with her other masochistic comrades. She knelt before the enemy and begged them to let her become a true sow.]

Yes... that's right, Master. Through my power, I have foreseen that you will attack the headquarters in five days. Because of that, 30% of the espers have already fled the base in advance. Bu-but... if we come here to receive our execution, then every single one of the esper girls can be processed and handled by our Masters without a single one missing. That is the happy future we saw.

Hohoho... So these are the three esper sow brats who surrendered earlier. Their names are indeed on the esper list. Telepathy, Future Prediction, and Clairvoyance, was it? Even though their combat power is zero, they're all S-rank and quite convenient esper sows. So, you used your power to see the current state of your fellow sows and your own future... and that's why you conspired with them to come here and surrender?

What a bunch of hopeless, masochistic sows. Then, as you wish, we shall dismantle you. Your brains will be provided for S-rank ability research, and your bodies will be processed into merchandise. So, be used by us until you break.

I... I want to become a wonderful sow just like my seniors, so please, I beg you to kill me. Of course, I'm still a virgin, and my meat doesn't smell gamey at all.

Thank you so very much!

Video recording of Asazuki Lily's capture — Produced by Neromashin.

Actually, these men had seen me before at a social gathering... Back then, they already seemed displeased with my arrogant and rude attitude... They also saw Dad's growing power after allying with Synapse as a major obstacle... So they contacted the terrorists and sold them information...

By now, I've been raped by nearly 30 men... My little girl holes—both front and back—have been mercilessly violated by their thick cocks... I used to spout arrogant words, but now my limbs have been cut off...

Dad... can you see this? After Synapse was attacked and I was captured, I was sold to these influential men in finance and politics... Right now, I'm being raped while my body is slowly taken apart...

After this, I'll be dismembered while still being raped... I'll be 'educated' by these men's cocks until I become a proper lady who gushes at the mere sight of one.

Once I'm fully turned into a fleshlight, I'll be sent across the country for men to take turns using my holes...

My body only has value when it's being used... I'm so grateful these men have found such an efficient way to make my life meaningful...

Once I'm completely used up, I'll be sent back to the terrorists to be repurposed as a lab animal... So don't worry, Dad.

Oh... and by the time you see this video, Dad, the terrorist squad will already be on their way to your location... Goodbye... Dad.

This gel will serve as fodder for the captured espers.

It's been over 8 hours of nonstop excretion since the gel, which multiplied in response to esper factors, was injected into their bodies.

Hey, try harder and squeeze all that gel out. Otherwise, I'll turn you two into human meat gel and use you as feed for the other sows.

Aaaahhh, it's coming out! ♥

The gel poop is squelching and squeezing out of my asshole nonstop... please don't kill me, aahhh!

I've already decided to toss these two into the shredder and process them into onaholes.

Subject 6. An individual who contributed greatly to the advancement of Ability Power research. She possessed a unique emotional profile, which unfortunately caused her Ability Power to go out of control, resulting in numerous casualties. During capture, she resisted violently, forcing the amputation of both legs before being brought to the lab. Suppression of her Ability Power was successful through drug administration, which also served as a test. [Once she had calmed down, the persuasion by the researchers began.

Originally, she seemed to have a peaceful and gentle personality. Persuaded by researchers that 'the advancement of science leads to world peace,' and above all, concerned for her family's bright future, she ultimately and willingly offered her body to the lab. Thanks in part to her devoted attitude toward the research, it was discovered that [Ability Power has a close relationship with the brain. The full scope of Ability Powers, which had been shrouded in darkness until then, was being unraveled. Even now, Subject 6's brain remains connected to the lab's host computer, [continuing to contribute to the advancement of Ability Power research.

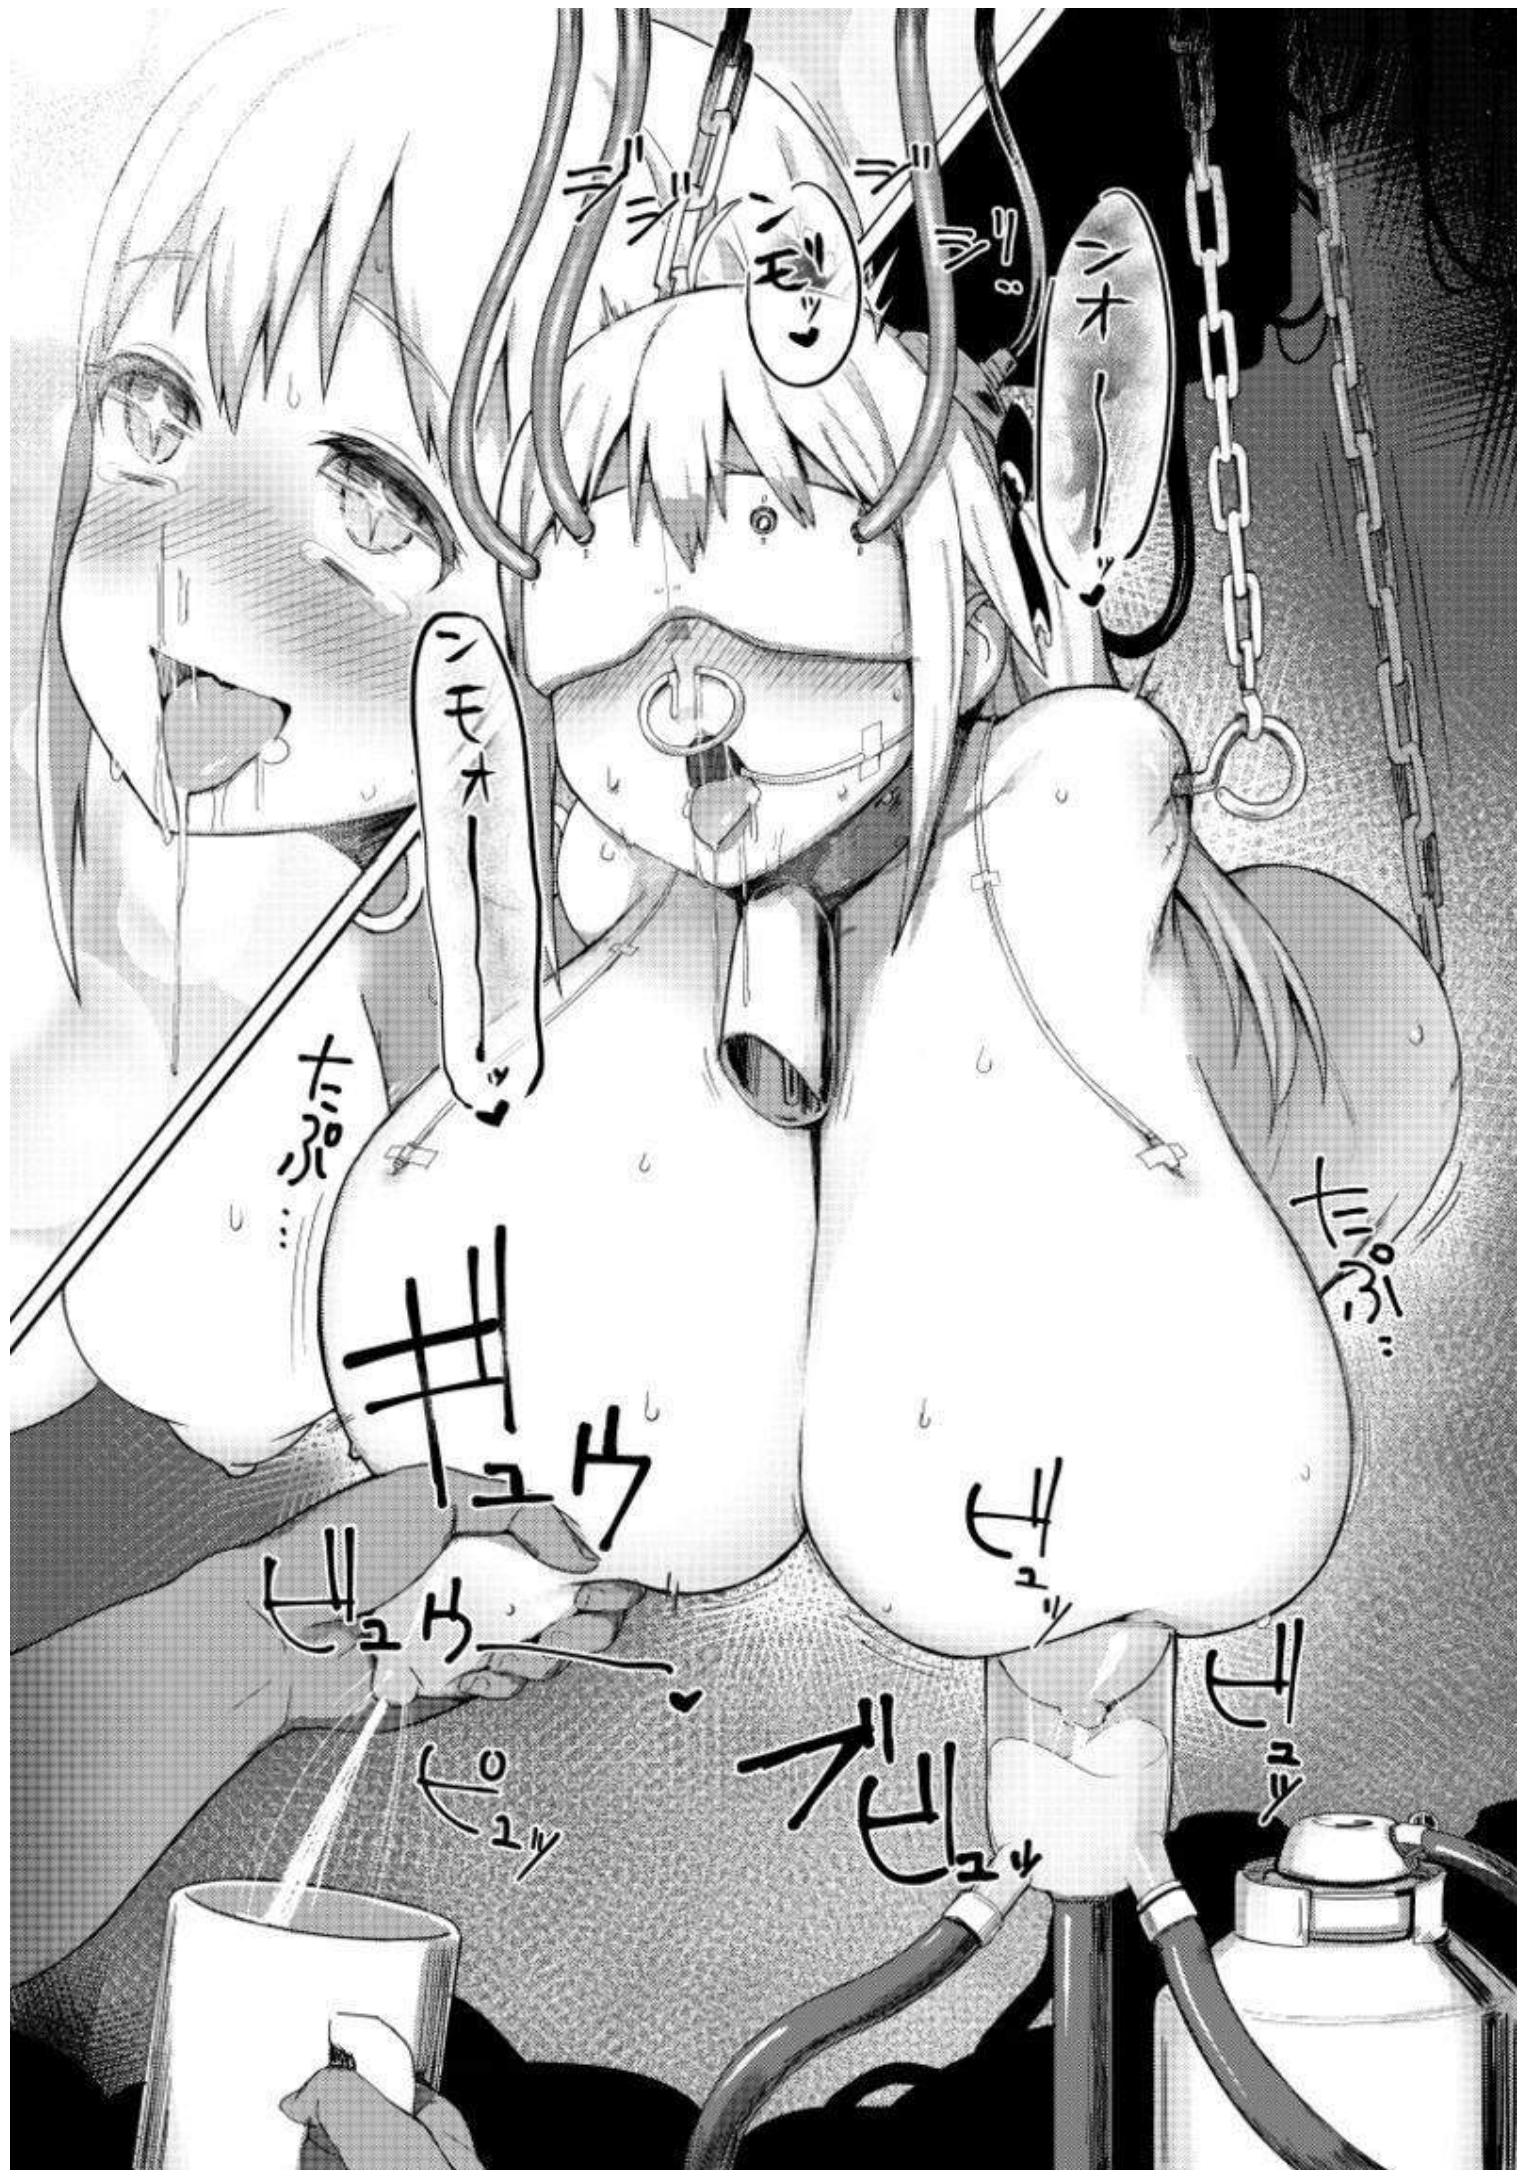

Information is mechanically extracted from the ability users lined up here. After extraction, they are basically disposed of or processed into meat. Individuals with potential are processed into biological devices, while those without are taken to special torture rooms. Among the ability users, those who resist fiercely have their skulls opened and their brains tampered with, turned into individuals who are forced to feel pleasure. [Capture/Stubborn/Torture/Four Limbs/Agony/Information/Information/Dark Market]

To think that I, who possessed such power, would end up in this state! I was the only daughter of a high-ranking official in a government-affiliated ability user organization, a person with immense influence! However, overconfident in my own strength, I left my parents' protection and recklessly brandished my power, and this pathetic sight is the result. Even though I possessed powerful supernatural abilities, I simply followed my whims, slaughtering members of opposing organizations... 'B-Bitch, hag, help... ah♥'

The Special Supernatural Crime Task Force "Synapse" served as the final bulwark against the spread of chaos. However, following an attack by a Japanese criminal organization, the gifted girls within its ranks went missing. Half a century has passed since the last great war... The specialized military research conducted in Japan during wartime leaked into the underworld during the post-war turmoil. As the final line of defense against this proliferation, the "Synapse" headquarters was raided by a criminal syndicate, and its gifted members were scattered.

I will never allow the existence of evil!

Citizens, please follow instructions and evacuate to the safe zone! I will stop the rioters myself!

Ah...! Lady Charlotte...! Thank you so much...!

—Charlotte Maxwell— Age: 16. Ability: Noblesse Oblige (Synapse). A member of the European Branch. Part of the elite unit 'Nobles,' which forms the core of the European Branch, her ability is gravity manipulation. The area of effect for her ability is extremely vast, making her exceptionally skilled at suppressing enemies. Furthermore, she can apply her ability to her combat suit, allowing her to manipulate gravity on her own body to achieve flight. Born into nobility, Charlotte possesses the noble sentiment of protecting the weak. She is polite to everyone. Even when using gentle language toward enemies, her clear hatred is still palpable. While Charlotte is deeply trusted by the citizens, she is despised by those marginalized by society, who denounce her behavior, claiming she 'says she fights for the weak, but chooses exactly who to save based on her own whims.' Charlotte Maxwell

Emily is with the medical unit. She isn't a combatant! Let her go right now!

Emily...!? Weren't you in another sector guiding the evacuation...?

Alright, alright, that's enough—hey—look over here!

You just finished brutalizing my subordinates, so don't give me that nonsense. If you try anything funny, I'll blow this brat's head off.

Eek...!!

Don't get so worked up. Why don't we make a deal?

How despicable...! Dragging innocent civilians into a riot... just surrender quietly already!

Charlotte-senpai...! I'm sorry...!

Since you've gone that far... hey... beat it.

...Fine, I'll agree. My ability has been deactivated. Let Emily come over here.

Thanks to my subordinates' tireless efforts, this commotion is even livelier than expected. I never thought I'd be able to smoke out a big shot like you, though.

Ha... Hao!

As long as Emily's safety is guaranteed, I'll suppress them immediately after...!

This man must be the leader of the thugs... he seems to be plotting something, but he's just an ordinary human. He can't resist my ability at all.

To be honest, I don't want any more casualties on our side either. How about I return the brat and we call it a day?

An agent of the European branch of "Synapse," which became the provisional headquarters after the destruction of the Japanese main office.

Her S-rank ability automatically activates upon physical death, rewinding time to a "Save Point." Since only Yulia retains memories of the future, she is an invincible agent who can retry any mission or crisis until she succeeds.

However, that one success is built on countless murders, rapes, and tortures, unknown to anyone else. Through thousands of life-and-death loops, Yulia's psyche has become somewhat fractured. In her childhood, after being kidnapped by an old Russian criminal organization to star in a snuff film, she first triggered her ability at the climax of her execution. "Save Points" can be set freely at any time, though only one can exist at a time. To

avoid situations like illness or imprisonment, where she cannot actively trigger a reset, she usually leaves herself a buffer of more than a week before resurrection. Because of the time leaps, the actual time she has lived far exceeds several decades. With future knowledge, she has amassed a fortune through stocks and gambling. However, the pleasure she gets from money and drugs can't compare to the stimulation she gets from suicidal masturbation. Yulia heads out to investigate information related to an organization that started massacring her own, led by an individual known as the "Chalice Collector" who collects countless women, however...

How about this? Why don't we turn this arrogant investigator with her 132cm bust into a living doll and put a nose ring on her? She's only 16, still well within her prime, so she should last a few years, right? Let's just silence her like that! Once she's used up, we'll just kill her!

The supernatural item held by the "Vessel Collector": Infinite Life Extension Device (Julia Meat-Processed Product)

A portable device processed from Julia Ivanova, a fallen former "Synapse" S-rank agent who was fitted with a nose ring as a volunteer pig. If the heart of the owner, the "Vessel Collector," stops, the bombs embedded in the device's brainstem, spinal cord, and heart will automatically detonate, instantly ending the device's life. Subsequently, the supernatural ability held by Julia as raw material will activate, and the device will return to the "past" to inform the owner of how they will die. After receiving this advice, the owner can perfectly avoid death with 100% certainty. Her loyalty to her master is near-fanatical, and she is also excellent for use as a portable meat toilet. She is a convenient collection piece that the "Vessel Collector" is extremely fond of.

A member of the ability organization 'Synapse,' she is a cyborg fused with a demon. Her ability is 'Summoning the Demon.'

Through 'Hand of Maphas,' she can summon a gigantic demonic arm possessing monstrous strength capable of crushing or tearing humans apart like insects. Through 'Eye of Oroboros,' she summons the demonic eye that peers into the future, allowing her to see events hours ahead.

Additionally, due to her fusion with the demon, her body has gained immortality. Though her abilities are nearly invincible, forcibly merging with the demon comes with a fatal flaw—if the 'Synapse-Made Pendant-Type Control Device' on her chest is destroyed, she loses all control over the demon and, consequently, all her powers.

Originally, she was a powerless individual. As an outstanding researcher, driven by envy and jealousy towards ability users, she lamented her lack of powers and voluntarily became a test subject for artificial ability research. Through sheer willpower, she overcame rejection symptoms and obtained the power she so desperately desired. Now wielding demonic powers, she still occasionally falls under the demon's influence, calling herself 'the Chosen One.' Her personality is severely twisted, mocking those without abilities or with weak powers as 'monkeys.'

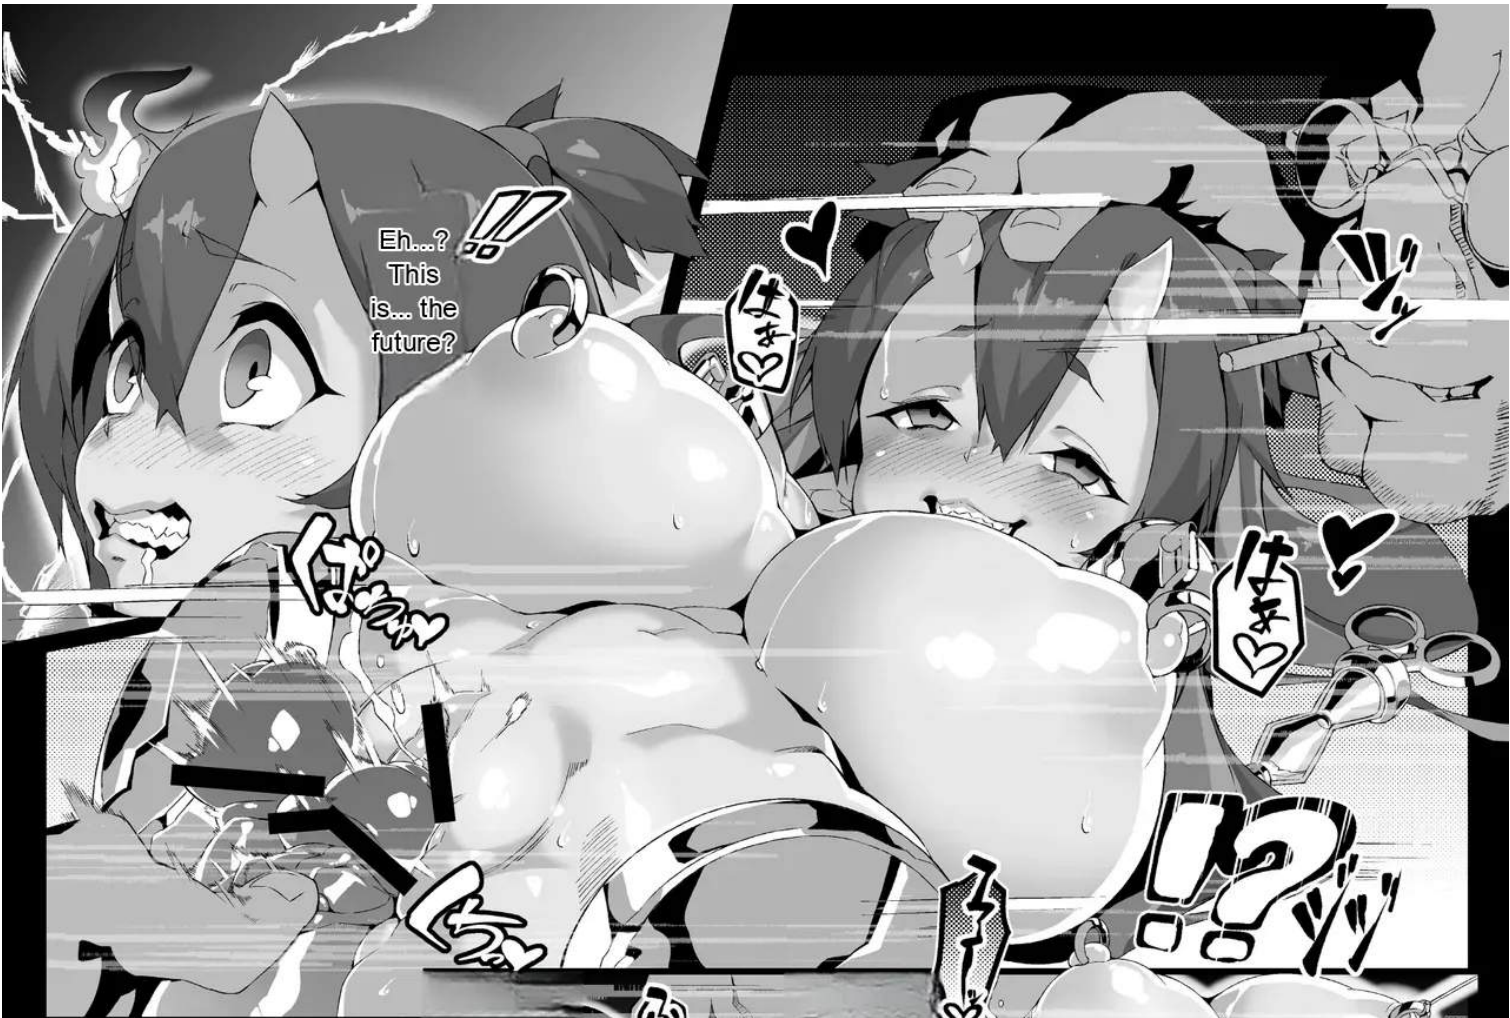

It reeks! What a disgusting stench! You social scum! Monkeys without abilities like you shouldn't even exist in this world.

·Abilities 'Defensive Wall' and 'Rebound': The 'Defensive Wall'  
prevents her from being harmed. Attempting to harm her triggers  
'Rebound,' returning damage to the attacker unchanged.

Ever since discovering her ability as a child, she constantly heard the voices of others' dying agony. The result of ceaselessly peering into others' 'ends' twisted her psyche. The ever-present wailing brought chronic headaches. Before she knew it, she came to see this world as hell, believing only ascension could purify all souls. At some point in the past, she realized her ability extended further—she emerged unscathed from a severe accident. Such a woman would be unstoppable until her own life burned out. 'End' simply meant death, including humanity's final moment. Given this congenital ability, calling it a curse would not be overstating. Evaluated by Synapse's standards, it held almost no practical use. Due to her ability, her headaches grew worse daily. Once, she imagined someone's end as her own while masturbating, reaching climax instantly in abnormal excitement. She took this as divine revelation. From then on, she began abducting girls and sending them to the 'processing plant.' Each time she overlapped a girl's end with her own, approaching climax, her headaches—convinced this was God's blessing—her inhumane methods grew more extreme. Yet Elsa maintained her position with unwavering stability, entirely due to her cunning and cold-blooded nature. She stopped at nothing to board the ship of the esper criminal organization.

We'll begin softening the flesh immediately.

This is what a sow looks like right after entering the factory; after initial processing.

大いほぺやうにどいぬわい

This time, we're presenting the processing of the sows to you through special footage.

In the first stage, the meat daruma will be continuously softened; while injecting drugs, we'll also make the vaginal folds and cervix soft and smooth.

Be happy, sow! As livestock, you get to feast on a human master's semen and even get pregnant from it.

At this stage, most sows give in and become pregnant. Oh, everyone, look!

By alternating mating like this, the essence of being livestock will be thoroughly ingrained in their brains.

What a powerful ejaculation. This sow has no choice left but to get pregnant.

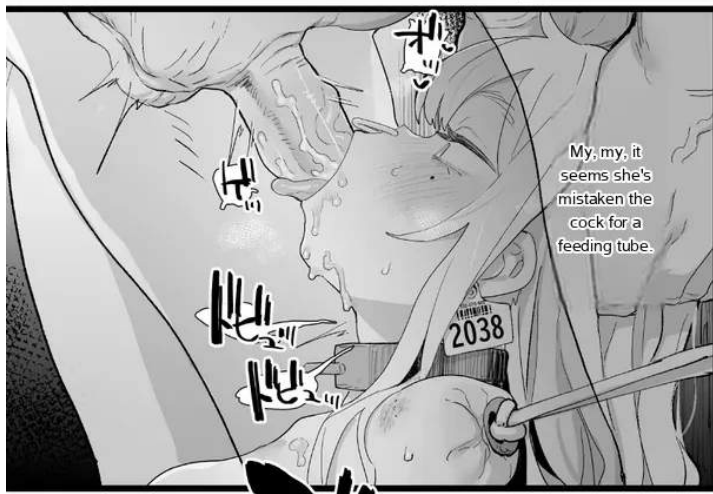

Phase Two: Forced feeding and drugging to complete the body remodeling.

Oh dear, oh dear, this livestock spat out her feed. That means your pussy is going to be lonely at lunchtime.

If you spit it out, I won't plug your pussy at noon.

In this feeding area, livestock are force-fed to increase the sow's body fat percentage.

This is what Phase Two looks like.

My, my, it seems she's mistaken the cock for a feeding tube.

After a massive amount of semen flowed into her stomach, she looks quite satisfied.

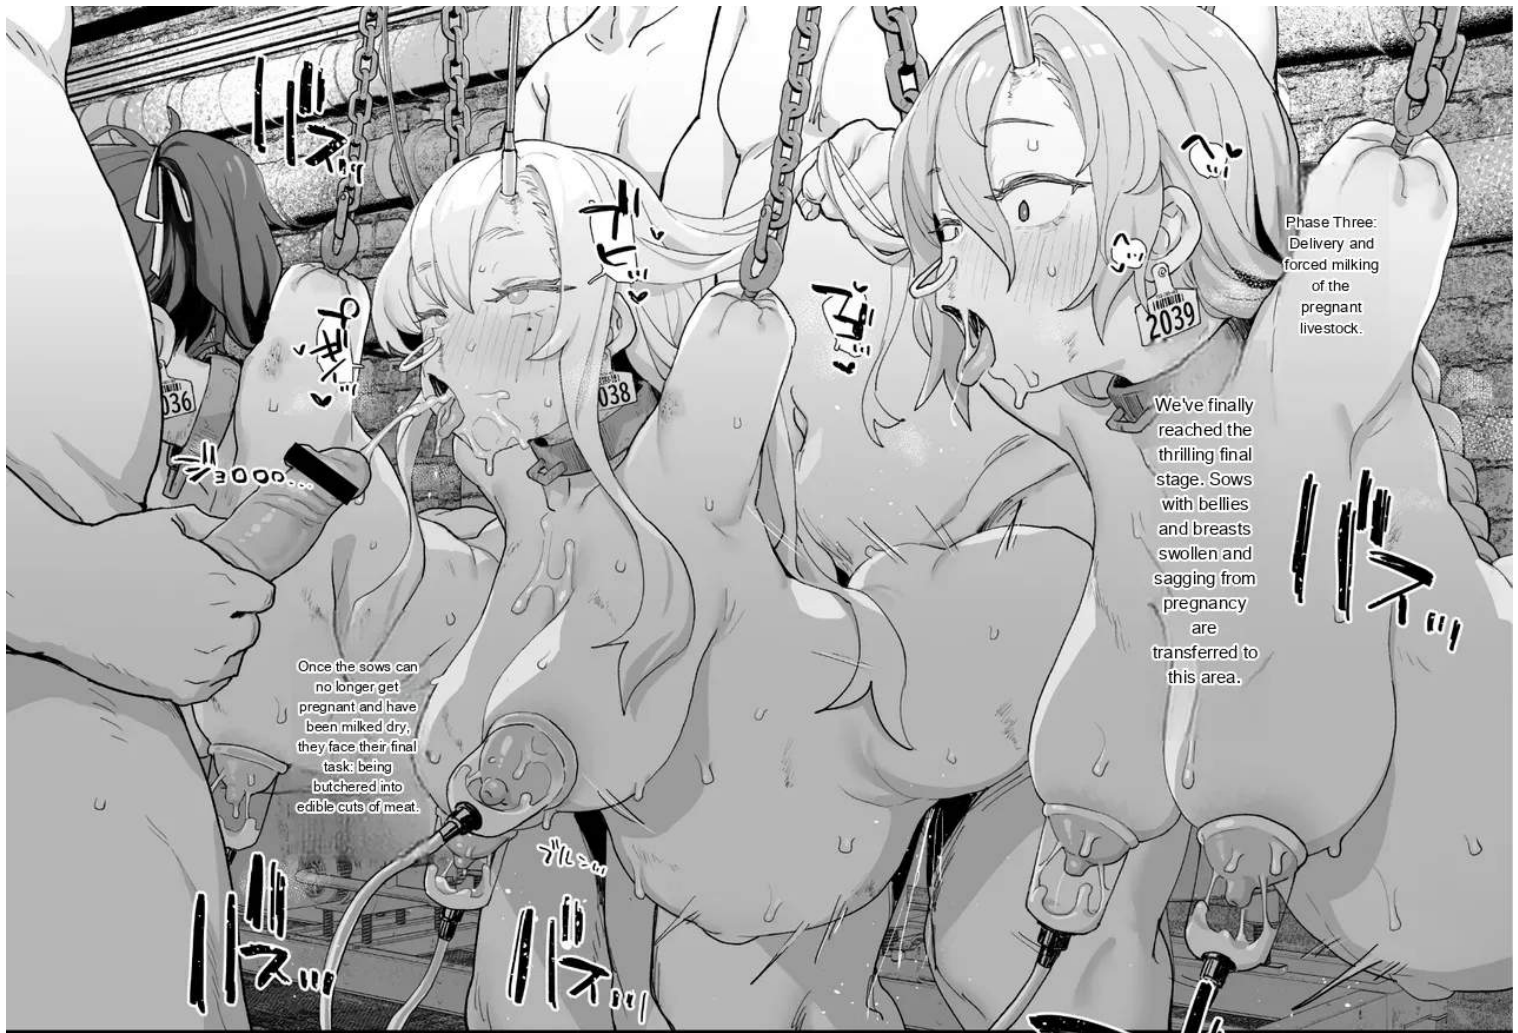

Everyone, please look. This sow's stomach has already expanded, and her breasts are swollen from hormone injections. Forced feeding has made her belly plump and fatty; it seems she can never return to her original figure.

One month has passed since then.

Phase Three:  
Delivery and  
forced milking  
of the  
pregnant  
livestock.

We've finally  
reached the  
thrilling final  
stage. Sows  
with bellies  
and breasts  
swollen and  
sagging from  
pregnancy  
are  
transferred to  
this area.

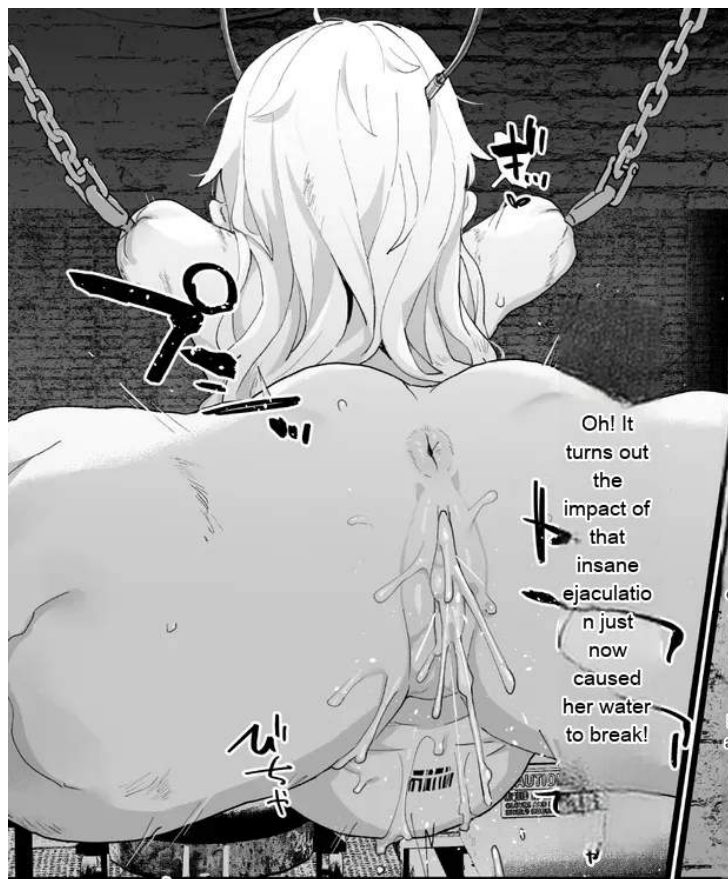

Once the sows can  
no longer get  
pregnant and have  
been milked dry,  
they face their final  
task: being  
butchered into  
edible cuts of meat.

As her

organs take  
the impact of  
the  
pile-driver-like  
thrusts,  
the sow  
can't take it

Even though  
she's about to  
go into labor,  
he continues  
to thrust  
violently into  
the expectant  
sow.

Oh! It turns out the impact of that insane ejaculation just now caused her water to break!

Most sows show expressions of pleasure after being ejaculated in, but this one looks like she's in a bit of pain.

Huh? Something seems a little strange with this sow.

A few hours after her water broke, a small head finally poked out.

The sow is also doing her best.

If the cub is male, it will be disposed of immediately; if it's female, it will be kept and raised as livestock.

The sow looks relieved to have given birth safely... Well, well, it seems she values the cock more than her own children.

And so, the cycle continues, and the livestock will keep multiplying.

Consider this a small return for the 'care' you gave me in the past.

I'm impressed you survived in such a harsh environment. If I hadn't kept an eye on you, you'd probably be in the meat grinder by now.

in only because she was an ability user. The family that raised her was incredibly arrogant; from a young age, she was brainwashed into thinking that "lower-class, incompetent commoners" are evil,

and that slaughtering them is a noble's duty. Though they do train her as an ability user, there's no blood relation, and she'd be cast aside immediately if she ever lost her usefulness. Even so, she deeply respects her family. She's single-mindedly devoted to meeting their expectations. As for love and sexual preferences, she holds to platonic ideals. She has an intense obsession with marrying a wealthy, handsome nobleman on her level and building a happy family.

MEMORIES OF YOU  
能力：右手的恋人

Zoe can learn the thoughts and actions of anyone she touches. Even if it's just their nails, blood, or hair, she can track them. If the person she touched is already dead, she can read their residual memories from before death. This ability is incredibly powerful for interrogations and intelligence warfare. However, in sudden combat situations, since she can't touch her opponents and has no combat ability whatsoever, she's quite a burden. Coming from a poor family, Zoe was often looked down upon and abused by nobles who valued combat strength. Through her ability, she learned many secrets of other ability users, but she never had the courage to blackmail them—her personality was submissive and timid. She felt inferior about the good physical development common among ability users. After joining the 'Synapse' organization, she saw the girls around her confidently fighting on the front lines even while wearing revealing combat suits, and she came to admire them while feeling depressed about her own cowardice. Zoe's hobby is using her ability to peep on others while masturbating. To facilitate her peeping and build a collection for her self-pleasure, she secretly gathers her teammates' hair or used sanitary products.

Is this confiscated pork really the flesh of Yulia, who went missing last month? Use your ability to confirm it. After all, that's all you're good for, right?

Apparently, the flesh of an ability-user girl can fetch a high price on the black market as an elixir of immortality.

This 'Daruma' orgasm feels so good—I'm so happy♥ I'm gonna die♥

I'm cummin' g! This sow is cummin' g!

O-Of course...♥ I'll do anything for you, Master! The Intelligence Department's login password is...♥

If that useless girl is actually dead, then so be it. But if she's still alive, we have to go rescue her. It's a pain, but rules are rules.

I said hurry up and confirm it already!

O-Okay...

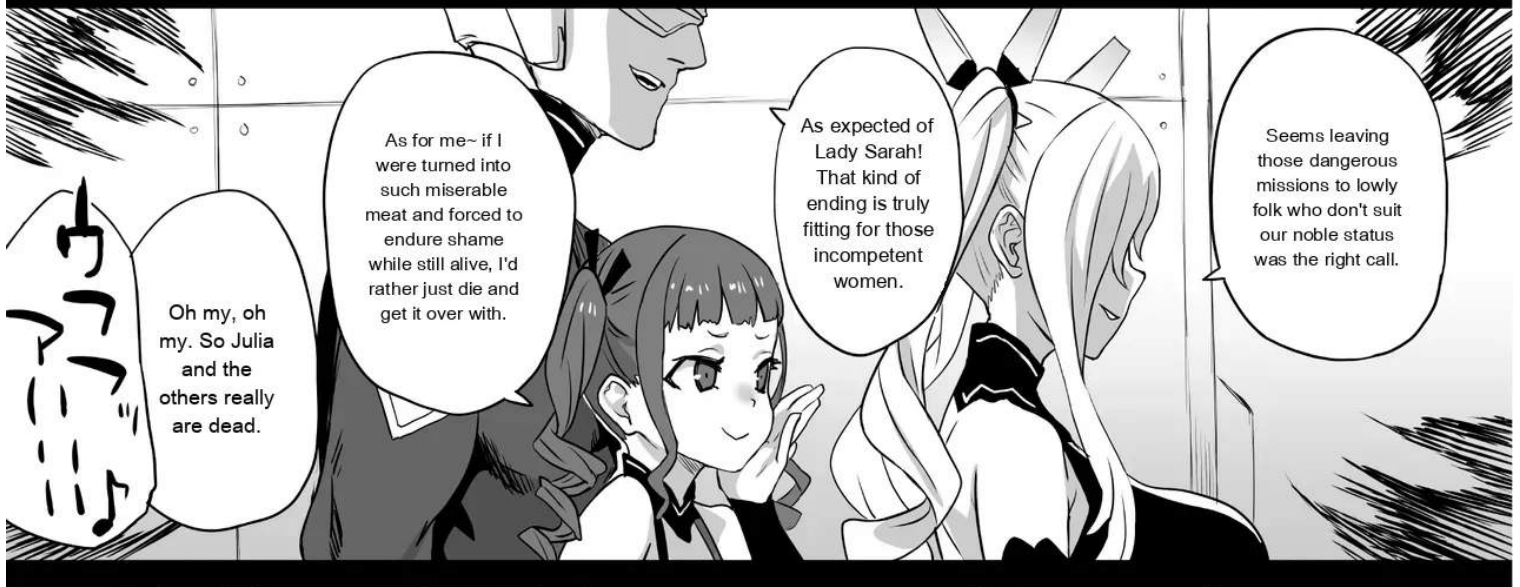

Be sure to throw away all that filthy pig meat. Don't be stupid and eat it.

Oh, stop it, Lady Sarah~ Even if they're subhumans with filthy bodies... they wouldn't do something that barbaric.

Oh my, oh my. So Julia and the others really are dead.

As for me~ if I were turned into such miserable meat and forced to endure shame while still alive, I'd rather just die and get it over with.

As expected of Lady Sarah! That kind of ending is truly fitting for those incompetent women.

Seems leaving those dangerous missions to lowly folk who don't suit our noble status was the right call.

I wonder what they'll taste like...♡

Lady Sarah's arm...  
Salome's leg...

That's not it at all. Everyone was so happy before they died... it was a bright slaughterhouse full of laughter... chests pounding with happiness, wombs aching with joy...

Worshipping the men who were willing to use them, and thanking them for being willing to process them...

While Marilyn is diligent in her magical research, she is an extremely arrogant psychopath devoid of ethics. She views others solely as test subjects. Back in elementary school, she repeatedly used her classmates for crossbreeding experiments with demons, resulting in many deaths. She is a genius witch who has been able to summon the Great Demon 'Dellumton' since childhood.

Since that troublesome incident spiraled out of control, the head of the Pirouette family handed Marilyn over to 'Synapse' to keep her isolated and under surveillance. Because Marilyn was raised as a prodigy from a young age, she developed a personality that refuses to listen to anyone. She joined 'Synapse' willingly due to her deep interest in their highly advanced research facilities and illegal experiments.

Marilyn is currently affiliated with the Artificial Ability Research Department of the supernatural organization 'Synapse.' During the synthesis experiments on Ayame Kiryuin, she summoned the demons used for the testing.

Marilyn Pirouette (16). Marilyn is a member of a witch lineage that has persisted since the Middle Ages. Her family has acquired supernatural abilities through magical research for generations, and Marilyn inherited this ancestral power. Her ancestors used these abilities to secure noble status while operating as witches.

Her ability is the 'Unreasonable Contract.' This power allows Marilyn to summon and command demons without any sacrifice, cost, or risk. She uses this ability to control the Great Demon 'Dellumton.' Although Marilyn's physical constitution is merely that of an ordinary human, she remains impervious to harm as long as she is under Dellumton's protection.

Delumton demanded that the criminal organization build a ranch exclusively for demons—the "Orchard." Here... they use powers stolen from witches and human girls to continuously summon demons.

I'm cummin' g... I'm cummin' g!

It hurts so much, it feels so good... someone save me!

After the witch's limbs were torn apart by Delumton, the criminal organization entered into a contract with Delumton in her place.

Ah-gyee ee! Cummin' g to death!

啊唧唧  
出来了

At the same time, Delumton stripped the Fruits of all their emotions; these emotions serve as nutrients to feed the demons.

Orgas m until death, but I'm so happy..

Through contract circles carved into their wombs, the "Fruits" are forced into contracts with demons, continuously summoning a massive number of demons from within. As for the seedbed, the witch named Marilyn has already been forced into a contract and "brutalized" for 600 years.

The girls hangin' g here are collectively known as "Fruits."

I still can't die! No, please! Kill me! Del-Lumton-sama, please kill meeee!

Even if the 'Fruits' have their brains and internal organs completely devoured, they will remain alive.

According to Del-Lumton, by forcibly binding the soul to the flesh, one can become immortal. Even without a brain, they can continue to live.

Nooo! I'm going to be happy again, aaaah!!

Eeeek! It's devouring my body again! It's being born! It's so scary!

Ah, heehee... hah♥ I'm so happy I'm gonna go again, ahahaha♥

The greatest advantage of this orchard is that these sows, whose brains have been removed and discarded... can be reused.

But everything feels... so good! Ahhhh! I'm going to climax again! I'm going to be so happy! Someone save me!

The demons produced by the 'Fruits' will serve as biological weapons on the front lines of the criminal organization's battlefields. As long as they continue to offer sacrifices to Del-Lumton, the Great Demon will maintain a peaceful coexistence with the organization. As for sows, there are as many as needed. Surely, this place will continue to be effectively utilized as a recycling factory for discarded pigs.

Through cruel violation, she has even developed a fear of happiness itself. Listening to her screams filled with terror, pleas for mercy, and bliss seems to be Del-Lumton's most enjoyable hobby.

Then, using the remaining flesh and soul as a sacrifice, they continuously produce demons from their entire bodies. Furthermore, they will never die, and will be cruelly abused by demons for all eternity. In particular, a certain witch is Del-Lumton's favorite. By inflicting horrific pain upon her, he makes her feel the supreme happiness of this world.

Buffet Managarm Age: 13  
Height: 140cm Weight:  
38kg B66 W49 H70

The 'Moon-Devouring Wolf'... rumors persist that the Werewolf tribe fills their bellies by feasting on the dead. Buffet is a descendant of this feared race. Six months ago, 'Synapse' discovered Buffet living in a forest

in Southern Europe; her extraordinary physical capabilities immediately caught their attention, leading to her recruitment. Due to the 'Nobles' members' obsession with lineage, her background has subjected her to long-term contempt. Nevertheless, given her superb combat abilities, she was selected as the ace of the mobile unit. Buffet has a bellicose personality and sadistic tendencies. She harbors a deep loathing for the humans who once persecuted the Werewolf tribe. She feels immense pleasure when slaughtering humans. Possessing extreme combat power, she tends to be conceited about her own strength. Her lack of teamwork has led other disgruntled noble-born members to mockingly call her the 'Feral Tomboy'.

Her massive claws are rich with Tiger Snake-grade neurotoxins, and with the scientific prowess of 'Synapse,' the toxicity has been increased 1000-fold, making her a biological weapon feared by all opposing forces.

84cm (excluding prosthetics)

Affiliated with Synapse's European branch, she belongs to the special combat unit "Nobles" and is the current head of a noble family with vast wealth. As the only daughter of that family, Emma lived a carefree life, but a certain incident five years ago cost her both her limbs and her parents. Afterward, she was taken in by Synapse and given liquid prosthetics. Since that same incident, Emma has developed a deep hatred for members of criminal organizations, and in battle she fights with everything she has, determined to slaughter the enemy. She has an arrogant, aggressive, tyrant-like personality; however, this comes from an inferiority complex rooted in the fact that her innate ability as a user was not very strong, forcing her to rely on prosthetics to increase her combat power. Emma now works desperately for Synapse, and her assets are entirely managed by her uncle, who is her successor. Together with other girls in the organization who also use prosthetics and share a bond with her, she carries out operations to subjugate the criminal organization "Misnak," which is deeply tied to her past, but...

Blood Sloan  
能力：尊贵血液之拥抱

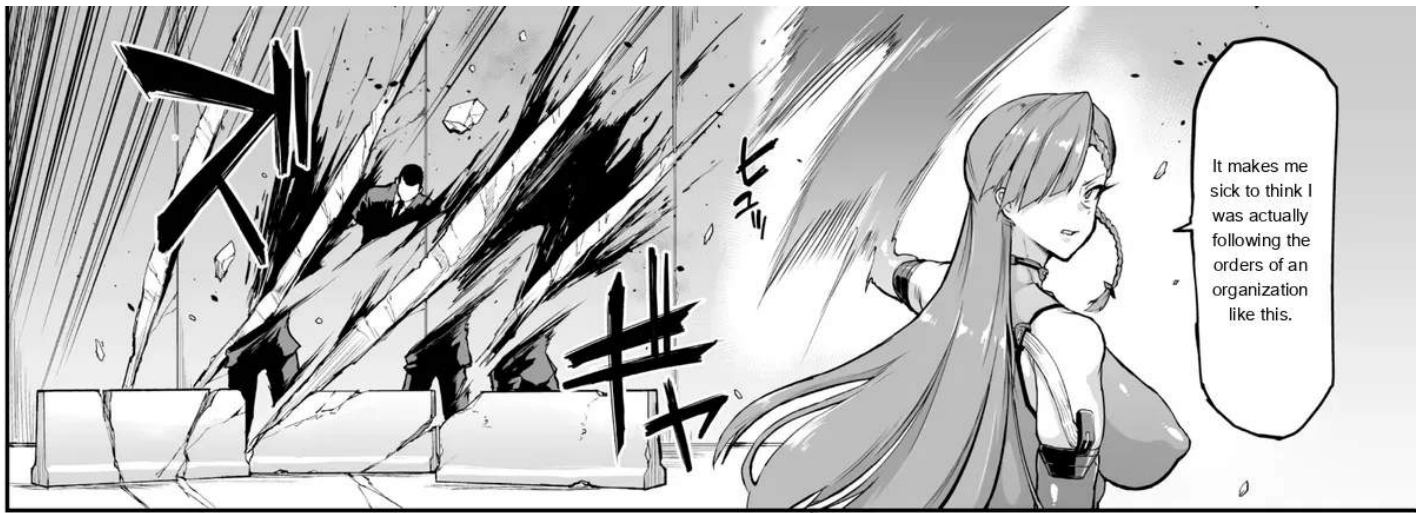

Emma can manipulate her own blood. Because this ability burns through huge amounts of blood, she needs a very high-calorie diet just to keep her blood volume up. If she were only using spilled blood to form a small blade, it would barely rate as a C-rank ability. However, the liquid prosthetics provided to Emma by "Synapse" are near-invincible armaments created by combining Emma's blood with the cells of a super-regenerative ability user (registered under the Japan branch as Tachibana). These liquid prosthetics can freely alter their mass and density, and can easily withstand 120mm smoothbore shells that would test even the composite armor of the latest main battle tanks. Sockets are installed at the amputation sites of her limbs to amplify the blood-manipulation signals sent from Emma's brain, allowing her to control the liquid prosthetics more effectively.

It makes me sick to think I was actually following the orders of an organization like this.

Just like the intel said, it's a useless ability. That was easy.

Leanna Alcaeus B92 W52  
H88 Age: 15 Height: 165cm  
Weight: 56kg

Born into nobility, this elite is extremely proud. As a result, her personality is noticeably flawed. An esper belonging to the European branch of the ability organization "Synapse." Combined with her own powerful abilities, she has become arrogant and self-centered.

异能力：触指支配 (Tactile Telekinesis)

Leanna can control anything she touches; she is an incredibly powerful A-rank telekinetic. Objects move on their own according to her subconscious imagination. Her overwhelming S-rank physical prowess is actually nothing more than an effect of her ability. The moment her body touches anything harder than a liquid, the object reacts regardless of her conscious will. And because her subconscious image of herself is that of a "superhuman"—

【Leanna herself does not know her ability is telekinesis; she has always believed her power is a form of physical enhancement. The Research Department believes it is precisely this cognitive bias that makes her subconscious imagination even more potent, strengthening her abilities. Therefore, the truth of her ability is classified information that has not been disclosed even to her.】

Her ability began to manifest during infancy; in her entire life, she has never experienced what "pain" feels like. Consequently, Leanna is extremely insensitive to the suffering of others and has been diagnosed as a sexual sadist with antisocial personality tendencies. She has boasted that her greatest pleasure is provoking enemies and slaughtering them one-sidedly. Leanna is always seeking excitement and lives an aggressive lifestyle. She is quite dissatisfied with the fact that she has never experienced anything that made her feel in danger.

Salome can create a reflective field with her hands. Not only physical objects, but water, fire, and even other abilities can be directly repelled. It's an ability that reflects everything. Salome grew up in an orphanage and was discovered by "Synapse." Because she was born into poverty, she has a deep resentment toward "Nobles," a group made up mostly of aristocrats who look down on her, and she's plotting to overthrow them.

She and "Zoe," who also came from a poor background and was mistreated by members of the aristocracy, became best friends almost immediately after joining. An ability-boosting device has been implanted in Salome's forehead, increasing the explosive power of her ability. The device is still in the testing phase, and its performance and effects are classified, but Salome has already bragged to Zoe about all the details.

enemy base...  
Salome, you need  
to be extra careful...

It seems the  
short-sighted  
command has  
finally  
recognized my  
talent. I'm  
itching for a  
fight~

Everyone without a gas mask, fall back!

Sorry! Kept you waiting!

—Zoe!  
We'll be together forever!

Heh  
heh...  
You're exactly right, Salome!

When two people strive for the top together, age doesn't matter at all. We're equals. E-QUALS! Right?

It doesn't matter what you attack us with! I'll bounce it all back!

This is... nerve... gas...

My... my vision is wobbling...??

It exploded... before it could be reflected...

What? A smoke screen...?!

If it spreads out, we won't be able to deal with it...

I guess he got here early. Black Pig said this guy was a simple-minded, hot-blooded brat. Once the poison's out of him, let the guys at the Cafeteria have their fun.

You had us worried. According to our mole, the attack wasn't supposed to start for another two hours.

I don't mind handing him over to her, but isn't that woman going to be torn apart in the end anyway?

Speaking of which, that black pig woman said she wanted his limbs sent to her after he's butchered.

My conscience... is...

Why would a bunch of thugs have... prepared... something... like this...

We successfully captured the brat at the underground loading dock. We sacrificed a few low-level soldiers... but it's no big deal.

\*Spl

Ah... I'm done for.

Salome was strapped to a child's chair, and the device mentioned by the insider was being removed. Her former ambitions had long since vanished; at this moment, Salome was nothing more than a mangled shell, piteously wailing her friend's name and seeking rescue. Little did she know, the very friend she kept calling out for was the one who cast her into this hell!

Before Salome could be executed in the 'Dining Hall,' an insider tip mentioned that a special ability-assisting device is installed in Salome's forehead. Thus, she was spared from being slaughtered and dismembered. However, she was taken to a new room, where a far more cruel, living hell awaited her.

It's not 'painful,' it's supposed to be 'pleasurable,' right~? Why do you think we pumped you full of all those drugs?

Ah... ah... ah...

Agh! Not there!

Zoe!

Save... save me!

Zoe! Zoe! I'm dying! I'm going to die!

Being betrayed by a comrade is truly unforgivable, isn't it? We have to give that pig a proper punishment.

Zoe was that black pig's name, wasn't it?

The device in the forehead has been removed. Let's hurry up and take out the rest~

I heard you grew up in the Ashfield Orphanage, right? First sold by your biological parents to the Synapse 'Guinea Pig Training Center,' and then betrayed by your comrade to an enemy organization. Your life... is truly pathetic~

Zoe...

Zoe...

Hurry, hurry,  
let's go!  
We're all  
gonna be  
together!

Spatial Compression

A member of the European headquarters of 'Synapse' and an elite among the 'Nobles,' Vera was born into a prestigious family and is a typical high-class lady. Her ability can create a cubic 'space' with a maximum side length of 100 meters.

'Spatial Compression' is an S-rank ability that can compress the side length of this space down to millimeter units. Vera possesses extremely high destructive power, and one of her hobbies is destroying target buildings and facilities. However, her current mission is to rescue ability users from the Japanese Headquarters who were previously captured. In this rescue mission, Vera is required to use her ability to eliminate enemy combatants. Closely following Vera are two C-rank ability users. Both are admirers of Vera. The one named 'Steam' (right) has the ability to release smoke screens. The other, named 'Thermal' (left), possesses a heat detection ability.

--- Zara Cochrane --- Age: 16.

Ability: Electronic Senju. Leader of  
the Intelligence Department for the  
European branch of 'Synapse,' and

a commander in 'Nobles.' She possesses the supernatural ability to dive  
her entire personality into the network without needing any equipment.  
Using this ability, she connects to the 'Synapse' data backend to carry out  
operational command, information management, and manipulation. Zara  
can operate weapon systems through the network, allowing her

to carry out large-scale remote attacks single-handedly.

Since she has absolutely no close-quarters combat  
ability, Zara has assigned a personal guard with control  
chips implanted in their brains as bodyguards.

Zara has an arrogant personality, believing everything in  
the world can be controlled, and consistently views others  
as mere pawns. She openly discriminates against  
non-combatants who are useless in operations. Zara lets  
personal feelings interfere with missions, deliberately  
assigning people she dislikes to suicide missions; thus,  
she can hardly be called a highly competent commander.

However, due to the rarity of her ability and her  
high-level information processing, she has been  
granted a very high status within the organization.  
Zara enjoys hacking into an enemy's brain to disable  
their automatic firewalls, then finishing them off with  
her own hands.

intel the Black Pig provided.

Outside the jurisdiction of the Esper organizations, people who harbored resentment toward the world formed the European Technical Research Bureau. The Bureau joined forces with underground organizations in an attempt to dismantle "Synapse." It uses captured Espers as research material for various experiments, while planning to reap massive profits from the results.

Sarah, already worn down by the drugs, was powerless to resist. The adjustment process advanced without a hitch, smoothly reaching the final stage. The pleasure box deep within her brain was about to be unlocked. This sow is waiting for the final blow—

Sarah was taken by an underground organization and brought to the Technical Research Bureau's private adjustment room. Completely restrained, with drugs injected all through her body, she was to be turned into a high-end biological device. First, her five senses had to be carefully adjusted, unlocking the sensory locks buried deep in her brain one by one—

The system allows sensory data and memories to be recorded as electronic information, enabling others to actually experience the recorded sensations and memories. It never spread to civilian use, being primarily utilized for military training. In the underworld, it's called cyber-drug. Like real narcotics, the illegal trade of this electronic drug never ceases. There's a dedicated special device.

'If you want more drugs, tighten up that cunt properly, you sow.'

Give me the drugs

药药药药药

啊啊

别！别看啊！

'Your cute juniors are watching you~? Show them how cool you look~?'

Sarah's brain itself possesses extremely acute mental sensitivity to electronic information. Among them are memories of being tortured and experiencing physical pleasure—memories of sex slaves with limbs amputated and bodies drugged, memories of intelligence agents executed by cranial dissection before their comrades as a warning to others... and memories of people beaten like sandbags under the guise of endurance testing... These endless waves of climactic experiences continuously devour Sarah's mind—

Since Sara lives forever in a dream world, the fact that her own limbs are about to be severed no longer matters to her. Eroded by brainwashing viruses and cyberdrugs, she will sink into the depths of a distorted, beautiful dream... slowly taking one step closer to death.

To improve portability, work has begun on miniaturizing the device. Due to the brainwashing simulations and pain-to-pleasure conversion treatments used during the adjustment phase, physical stimulation may cause performance to drop. To prevent that and further improve portability, we're discussing whether the entire brain needs to be surgically removed—

This is the last time in your life you'll ever masturbate. Say a proper goodbye to your right hand. The moment you climax, I'm cutting it off.

No, stop, please! Masturbating is my only reason for living! Ever since I was nine... I've been rubbing my hole with my hand every single day! Without my right hand, I won't be able to do it anymore! Once I cum, my life of pleasure is over! I'm going to become a stump! I'll be nothing but a hunk of meat that can't even touch herself! Ah, ah—I! I don't want to, but I'm going to cum! I'm cumming so pathetically! My final climax, I'm going, I'm going! I'm cumming!

- Reunion of the Heroes -

Martha Alice Height: 139cm Weight: 37kg Age: Over 500 years old (details unknown)

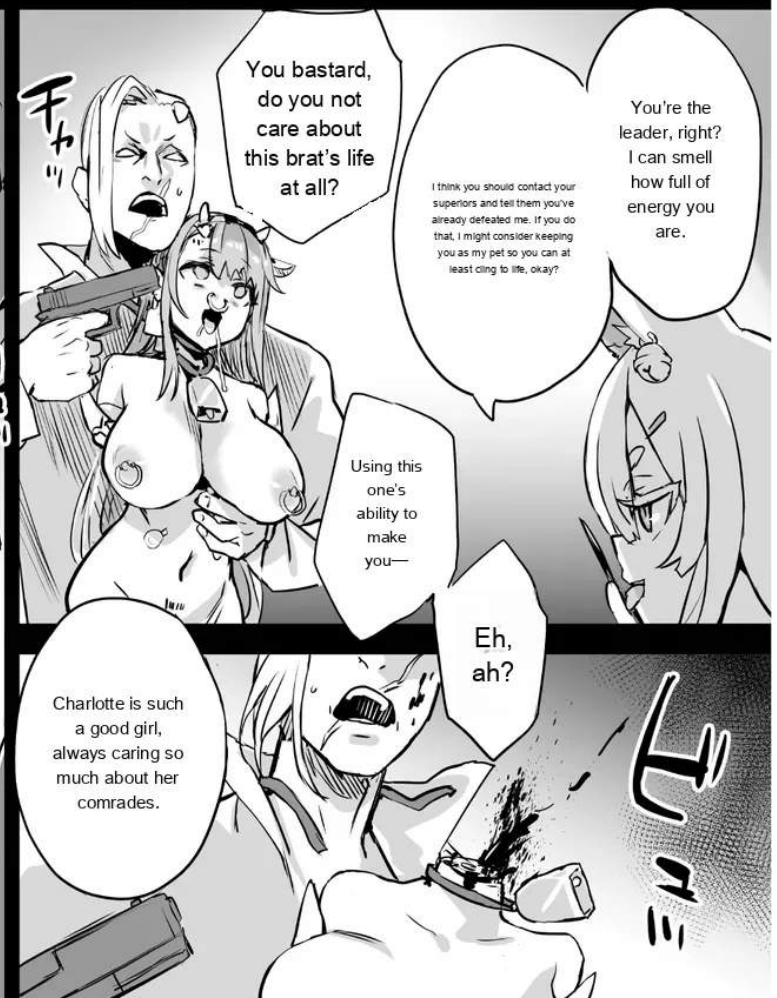

There are two theories about Alice's origins. One says that during the witch hunts, the soul of a witch who died a tragic death entered the body of her familiar, a cat. The other says Alice is a collective being formed from the souls of cats sacrificed over several centuries.

Alice herself has never explained her origins, so her true nature remains a mystery. However, from a genetic standpoint, Alice is unquestionably feline. The only thing that can be confirmed is that she's a being recorded since the Middle Ages.

Wednesday the Psychic Cat (Stray Cat) Alice can stop time for everything except herself. The duration she can stop time ranges from 1 second to 17,519 hours (about 2 years), and she can set it freely and use it continuously—essentially an invincible power. The only drawback is that once activated, the ability can't be canceled halfway through. As a child, Alice accidentally activated it once and was left alone in a silent world, suffering while waiting for it to wear off. Because of that trauma, for centuries she has only used it to stop time for a few seconds. In addition, her "Absolute Cursed Claws," on limbs stained black by curses and blood, can cut through stone and steel in a frozen world, with enough hardness to tear heaven and earth apart, making Alice nearly unbeatable in close combat. Having lived for an extraordinarily long time, Alice cares nothing for the lives of other humans or creatures. For her, simply staying alive—to eat, sleep, and have sex—is everything. Alice's attitude toward missions and research is extremely casual, making her somewhat unreliable even as a combat asset. However, because her ability is so powerful, she gets VIP treatment at "Synapse," where everything is handed to her on a silver platter. While she doesn't mind it when young girls dote on her like a cat, if a man treats her that way, Alice's extreme personality makes her instantly fly into a rage, even developing murderous intent toward men. Alice has caused nationally sensational incidents across Eurasia, the Americas, and other regions, always escaping by stopping time when things get serious. She likely stays at "Synapse" because she senses in those psychic girls something reminiscent of the persecution she faced as a witch. Alice's sustenance is spiritual energy; with supplies of moonlight, semen, and fresh blood from young men, she can live forever. She captures men with large penises, amputates their limbs, and keeps them as semen reservoirs and human flesh dildos.

Is this masochistic pig the captain you wanted to save? She worked herself to death as my pet. Doesn't she look like she's in a state of blissful climax?

If you want to be given a climax execution and turned into a subhuman flesh-plastic decoration like this, then serve me well and flatter me.

Oh—as expected, the brat next to her has the best reactions~ You should feel honored that I've gathered you all together for processing like this~!

Now then—everyone, let's reach a friendly climax all together, shall we? Ready... set...

Sarah and her guards were all recovered, and to ensure the biological devices performed at their peak, the brain extraction process began. Simultaneously, everyone's sensations were shared with Sarah, and the data from these climaxes was recorded to be sold on the market as a brand-new electronic drug. Even though their brains would be removed after processing, the evidence that they once lived in this world will endure forever—

Hey.

In light of recent political themes and the advancement of social diversity, the bodies of girls—which had always been treated with contempt as industrial waste—have been effectively repurposed as trash cans, ashtrays, toys, or toilets. An underground society that prioritizes social and environmental sustainability has finally been realized.

Even after death, women's social participation and utilization are thoroughly carried out. Not a single strand of hair is wasted; instead, they are used to their fullest extent. This is the happy end for them as heroes, a fate that everyone should aspire to.

Mother" Hail Mary. Ave Maria.  
"Holy Mother."

The first successful test-tube artificial ability girl created through Synapse US genetic engineering. Numerically the greatest masterpiece, but lacking any sense of right and wrong, sic enhancement abilities beyond mentally immature, she crushes anything she hates like ants. These and regeneration that beam fired during her first rampage circling the Earth seven destroyed Pluto, reducing the number in 1.4 seconds, and of planets in the solar system by one. 010004. Age: 13 (age before cryogenic sealing). Size: Height 165 cm, B122 W51 H110. Ability: General Enhancement Type.

Ultimately, researchers could not control her. Fearing her, humanity hid her underground and sealed her in cryogenic sleep. Beast V is a byproduct born during the process of creating her.

結局研究者 All common enhancement types—such as heat rays, regeneration, and muscular enhancement—are based on fragments of her factors. The girls of SUS who

Current Synapse US ability users have her weakened factors mixed in during pregnancy or training, but SUS leader Linda Alexander is her direct granddaughter, an experimental success with concentrated blood. Created as a designer baby with an appearance designed to appeal to men, she was born with fewer internal organs

Mother" Hail Mary. Ave Maria. "Holy Mother."

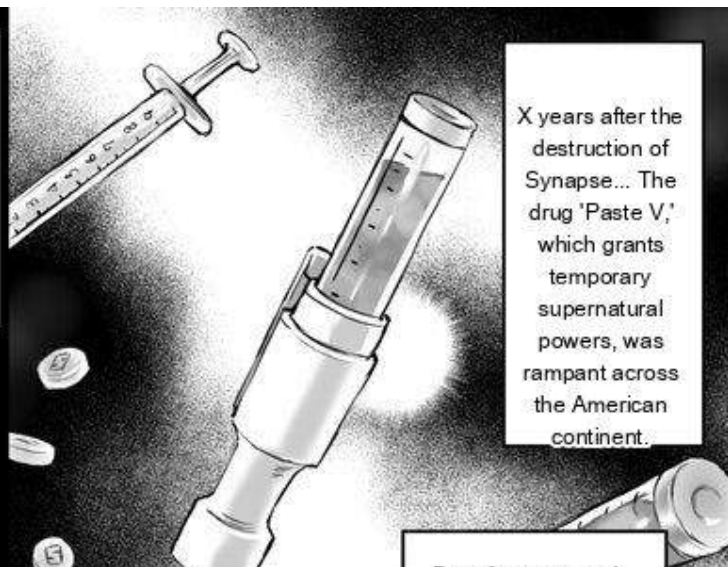

Former Synapse U.S. hero. Determined to create a world where girls with abilities could live freely without being controlled by men, she grew dissatisfied with Synapse U.S.'s policy of being run by male politicians and led a group of ability-wielding girls to defect from within the organization. As their leader, she founded the villainess group Girls Nation. Since the hero organization only had girls, her abilities went unnoticed there, but outside it, her power to dominate half of humanity was immense. Childhood friend of Synapse U.S. leader Linda. Girls Supremacy - Absolute Girl. S-Class Manipulation Ability. The power to turn any man who ingests her bodily fluids into an utterly obedient love slave under her complete control. Even evaporated sweat and sweet-smelling body odor carry this effect. While gas masks can block her scent, concentrated fluids like blood can penetrate even steel plates and protective suits with overwhelming force. She carries a blood-bullet gun as her ultimate weapon, but has never fired it. While her ability grants absolute life-and-death control over men, it also makes women 'like her as a best friend or lover,' causing nearby girls to grow affectionate toward her and never oppose her. This ability manifested from her childhood wish of 'not wanting to be hated' and 'wanting to be needed' during her lonely orphan days. Before her power awakened, Linda was the only one who stayed kind and remained her friend despite her having no powers, making her truly special. Spits in the state water supply, creating millions of male slaves. Protected by slaves in her autonomous district, where heroes cannot reach. Even the president, with whom she has a cooperative relationship, has been made genuinely obsessed with her through her ability... and is now trying to take over all of America... 'Queen' Abigail White (16)

Height 146 cm. B129 W57 H98. Likes: friends and companions, small animals, fruit candy. Dislikes: exercise, arrogant men, her own body type. Complex about her short height, long torso, short legs, large breasts, and thick thighs. Wears nearly 20 cm platform shoes to look taller than her subordinates. Actually prefers thick clothing that hides her ungainly figure, but suffers from extreme hyperhidrosis—wearing clothes makes sweat drip, which paradoxically strengthens her ability, so she spends most of her time nearly naked to suppress it.

Over 40 million low-status males sought salvation in the drug.

X years after the destruction of Synapse... The drug 'Paste V,' which grants temporary supernatural powers, was rampant across the American continent.

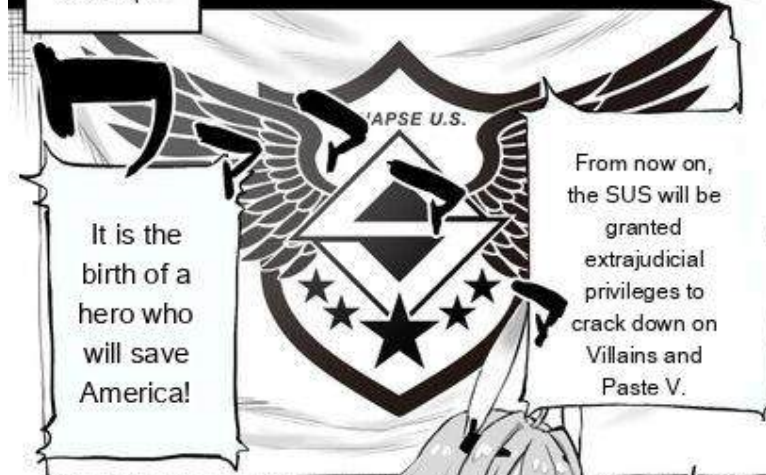

Young women were being abducted and dismantled by Villains to be processed into 'thinner' for low-grade Paste V.

The criminal organization 'Villains' flooded the entire U.S. with low-grade 'Paste' and were destroying American law and order, armed with military force and supernatural abilities.

Born from research into supernatural powers, this drug gave even incompetent, worthless commoners the omnipotent feeling of becoming a 'winner'—a power user—if only slightly; however, it was a lethal and dangerous drug.

To save a United States mired in such despair, one President stood up.

It is the birth of a hero who will save America!

From now on, the SUS will be granted extrajudicial privileges to crack down on Villains and Paste V.

Now! President of the United States Hannibal Smith and Synapse US leader Linda Alexander have shared a firm handshake!

Holy Knight" Hinata Cavendish (18).

Height: 154cm. B101 W54 H88.

A hero who fled to Britain after a coup d'état toppled the kingdom. She claims to be descended from the royal family, though the truth is unknown. A strict moralist who is hard on both herself and others, she tends to be overly severe toward evil; combined with the excessive aggression of her abilities, she was barred from offensive deployment by the SUS. Her superpower embodies tradition, history, and justice—making her the natural enemy of villains, as well as an Angel of Death to humanity, born with original sin.

Excalibur: Sword of Legitimate Rule. A-Class Armed Superpower. A shining weapon of justice that annihilates evil. It is normally stored within her own body and can be drawn at any time. Any human with a negative karma value will surely die the moment they touch the sword's light.

Because she delivers the judgment of death equally to murderers, shoplifters, or anyone with even the slightest inclination toward evil, her rule of justice grants no opportunity for rehabilitation until after death.

Paradise Lost: Eternal Banquet. S-Class Augmentation Superpower.

The true value of the holy sword, which can cleave through anything and never rusts, lies in the scabbard that houses it. By making herself the "scabbard" of the holy sword, she becomes its guardian. While the sword is sheathed, she achieves perfect immortality, is protected from all malice, and can never shed blood. Due to this ability, she is completely invincible while the sword is sheathed, making her defensive capabilities stand out among all superpowered individuals. This effect is lost while the sword is drawn and not in its "scabbard" state. Her actual physical age remains 13, the age she was when her powers awakened. If her agelessness can be maintained, she has the potential to become a permanent ability user, similar to the esper Alice who once existed in the EU branch.

A stray ability user raised in the slums. The ability to create wind scythes is mediocre. While the sharpness is good, it can only cut organic matter and takes time to aim, lacking versatility. Never scouted by Synapse, she grew up as an enforcer for a slum gang. After the gang was absorbed by the Villains, she was in charge of dismembering kidnapped women at the "Ranch."

However, having turned 20 this year, the end of this "girlhood" has finally arrived. Ava (20 years old) C-Class Ability User

The slave girls mass-produced here are still young, but once they pass age 20 and reach 'graduation,' they are processed into meat bags and recycled as broilers, realizing an eco-friendly, sustainable society capable of harvesting new ability users.

The 'Swine' unit, composed of these 'Sow-Killer' piglets, consists of ability user girls who swear absolute loyalty to the Villain men.

Some maternal bodies die from neck compression due to the fetus's weight gain, but the products born from this 'Death Orgasm' often grow faster and possess powerful abilities.

The revolutionary aspect of this ranch is that any woman of childbearing age—whether an ability user or powerless—can be utilized equally as a meat bag without discrimination. This has turned ordinary powerless women into meat bags that lay golden eggs, becoming a precious source of income for the Villains.

The Villain Ability User Ranch. By administering massive doses of Paste V to pregnant women, the ranch forces the birth of ability user infants. To prevent rebellion or escape of the maternal bodies, they are processed into 'daruma' (limbless) form and smoked while hanging by the neck, turned into specialized production broilers to mass-produce ability user girls.

women without esper abilities equally. She  
is enthusiastic not only in combat but also in  
service activities, and is loved by the  
citizens.

Grown-up Brebber Grown-up Born into a family  
of Southern doomsday cultists, her experience  
of being raised surrounded by firearms from a  
young age is the source of her esper ability.

Behind the hero activities, they formed a cult called the 'Holy  
Advent Faction' that fanatically worships the 'Holy Mother' revered  
by esper girls, believing that her return is the only way to make  
America great again. They see the current administration, led by a  
Black president, as unfit to guide the United States. They provide  
generated firearms to girls within Naps US who lack esper factors,  
and are preparing for armed uprising in line with the spirit of the  
'Holy Mother' they serve and the Second Amendment to the U.S.

(18)

A hero who went into exile from the Kingdom of Britain after it collapsed in a coup d'état. She claims to be a descendant of the royal family, though whether that is true is unknown.

A judge who is fair and strict with herself and others, harboring a sense of justice that cannot tolerate even the slightest evil. Due to the excessive offensive power of her ability, she is prohibited from deployment within the SUS. Her special ability embodies traditional justice in every respect, regarding Villains born with original sin as natural enemies—the Angel of Slaughter.

**Orthodox Blade:** An A-rank armament ability that manifests a righteous blade of light to eradicate evil. It is usually hidden within her body and can be drawn at any time. Anyone wicked who touches the sword's light will perish instantly.

Whether a murderer or a petty thief, Hinata passes the same sentence of death on anyone with even the slightest evil inclination. Under the rule of justice, all evil can only be reborn through death.

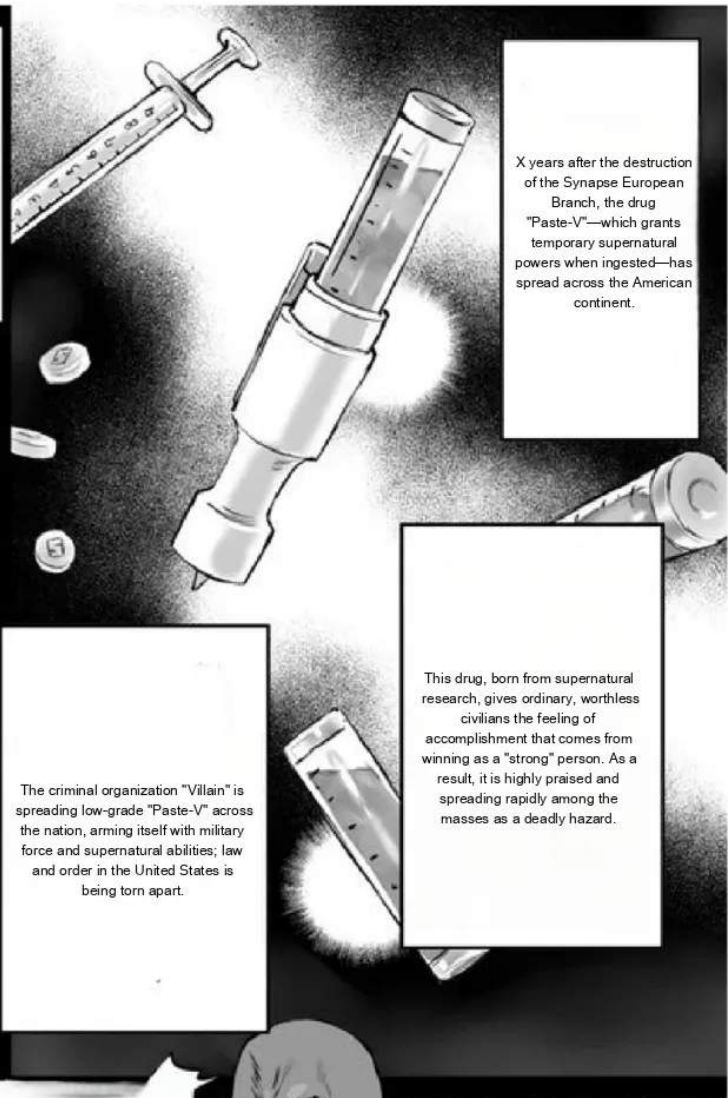

The S-rank enhancement ability "Severance of All" is no mere illusion. The sheath capable of housing the Holy Sword is the sword's most vital component. By treating her own body as the "Sheath" of the Holy Sword, she becomes its guardian. While the sword is sheathed, she is immortal and ageless, protected from all harm by the Holy Sword. Thanks to this ability, she is completely invincible while the sword remains sheathed, placing her defensive capabilities at the very top among all ability users; however, this effect is lost once the sword is drawn. Her actual physical age is 13, the age she was when her powers awakened. If she maintains her ageless state, it is possible for her to remain young forever, much like Alice, the time-stopping ability user who once existed in the European branch.

40 million vulnerable men have turned to the drug for help.

X years after the destruction of the Synapse European Branch, the drug "Paste-V"—which grants temporary supernatural powers when ingested—has spread across the American continent.

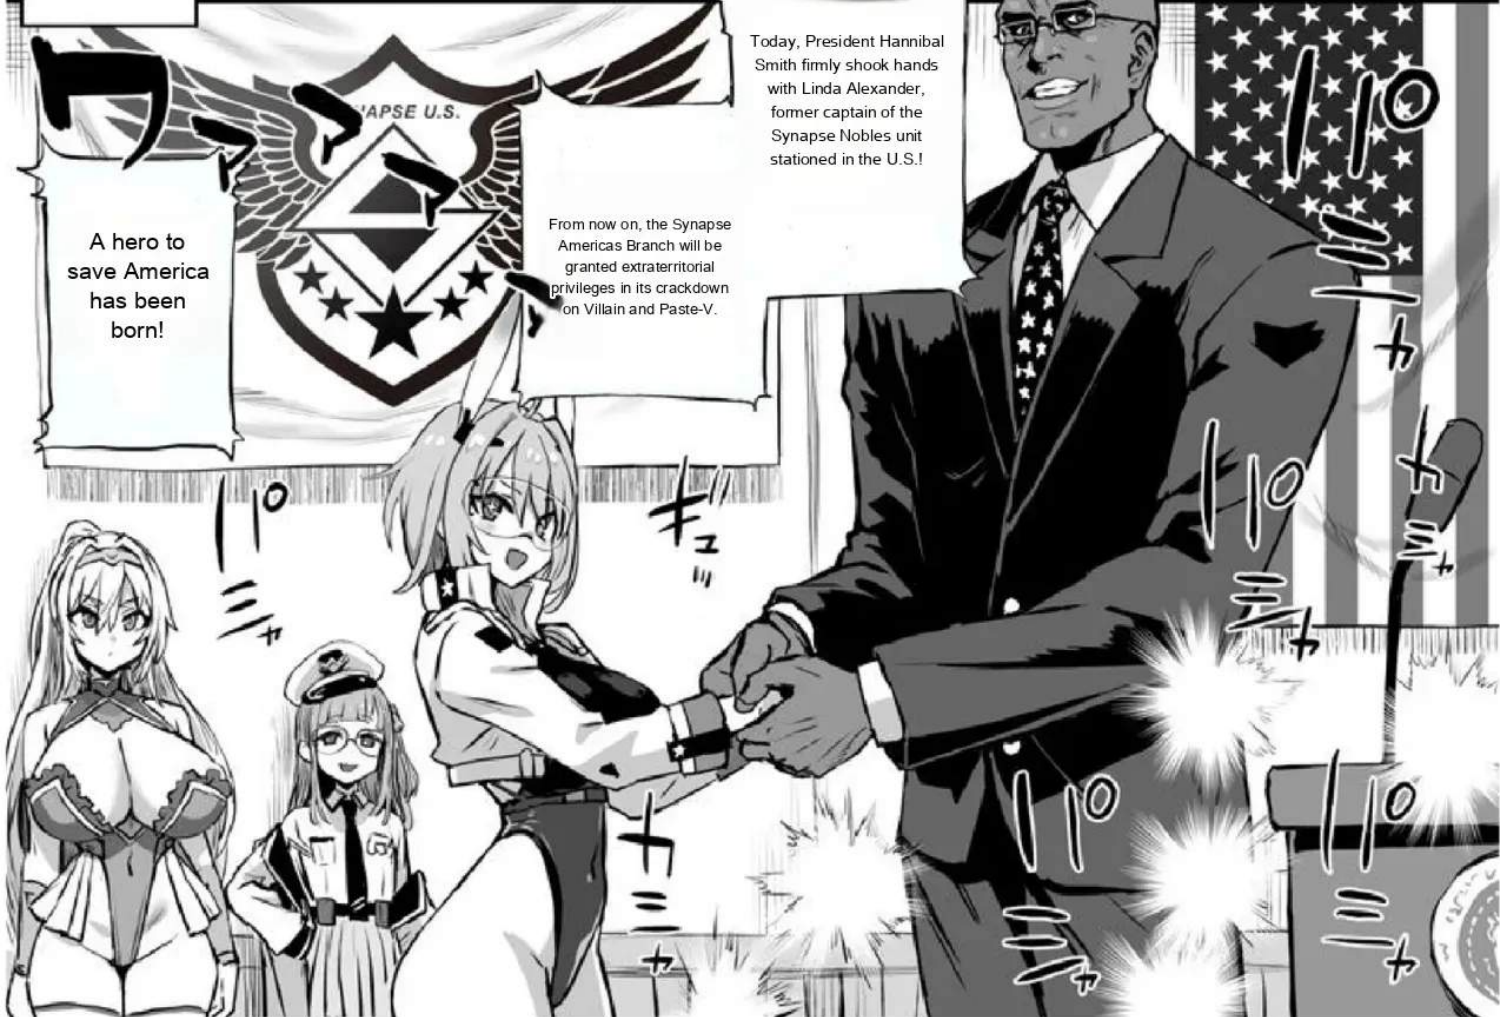

Young women are being kidnapped and dismembered by Villain, then processed into diluted solutions for low-grade Paste-V.

The criminal organization "Villain" is spreading low-grade "Paste-V" across the nation, arming itself with military force and supernatural abilities; law and order in the United States is being torn apart.

This drug, born from supernatural research, gives ordinary, worthless civilians the feeling of accomplishment that comes from winning as a "strong" person. As a result, it is highly praised and spreading rapidly among the masses as a deadly hazard.

In this desperate situation, the President has risen to save America.

Today, President Hannibal Smith firmly shook hands with Linda Alexander, former captain of the Synapse Nobles unit stationed in the U.S.!

A hero to save America has been born!

From now on, the Synapse Americas Branch will be granted extraterritorial privileges in its crackdown on Villain and Paste-V.

Ava (20 years old) C-Rank Ability User

A wild ability user raised in the slums. His puppet-making skills are mediocre. His ability, **【Cut】**, is extremely sharp but can only be used on organic matter and requires time to activate, making it lack versatility. Instead of being recruited by Norbus, he grew up as a violent member of a slum gang. Since the gang was absorbed by Villain, he has been responsible for dismembering kidnapped women at the 'Ranch.' However, having turned 20 this year, he has finally reached the end of his 'Maidenhood.'

Although the slave girls are still young, they'll "graduate" once they turn 20. After that, they're turned into wombs and reused on the ranch, creating a sustainable breeding society for new ability users that's kind to the environment.

As the fetus grows heavier, some mothers die from neck compression, and the offspring born from these dead wombs often grow quickly and possess powerful abilities. The unit formed by gathering these piglets born from slaughtered sows is known as **【Swine】**, and every member is an ability-user girl who has sworn life-and-death loyalty to the men of **【Villain】**.

The Villain Ability User Ranch injects pregnant women with massive doses of Paste-V to force the birth of ability-user babies. To keep the mothers from resisting or escaping, they're turned into "daruma" forms, then strangled and smoked. By specializing their reproductive functions, a vast number of ability-user girls are born. One hallmark of this ranch is that there are ability users among the breeding-age pregnant women, and ordinary people without abilities are treated the same as wombs. So even ordinary women without abilities are regarded by Villain as precious sources of income, serving as wombs that lay golden eggs.

Cyborg Psychocop for Maintaining Public Order CP-205B250kg approx. Bust 125cm approx. Waist 65cm approx. Hips 140cm approx. \*Individual differences occur depending on the original base body • Official Model Number EC-205B Affiliation: Police Age (Operational Period) 8 months Height 180cm approx. • The cybernetic organism cop for maintaining public order, deployed to police under President Smith's policy, commonly known as Psychocop, was developed in one of the sectors of the research facility Amnion. It is a humanitarian project that revives superpowered individuals killed by criminals by turning them into cyborgs. With enormous budgets poured into development to save patriotic young girls overflowing with patriotism, it has gained public support with the catchphrase 'The Immortal Cyborg Revived to Protect the Nation and Its People.' The base bodies of electric-type ability users are used in place of batteries to power the units, so their abilities can no longer be used. Therefore, they fight only with the pistols issued to the police. As mass-produced units using base bodies of various ability users, their appearances differ from unit to unit, but by mass-producing the same standard parts with inexpensive materials and putting them into operation, production costs have been significantly reduced. However, the budget keeps increasing year by year.

They framed me for treason against the state... and my communication network with Synapse was cut off.

I was caught by corrupt cops...

Thinking there might be a spy within Synapse as well, I had been acting alone.

President Smith himself might even be involved in this country's human trafficking... I was using my electrical control powers to gather server data, but that's when I discovered the collusion between the villains and the police... and that even the government was involved.

I remember now... I... was infiltrating this facility to track Synapse's ability-user villain human trafficking ring...

My attempt to infiltrate the police facility backfired on me.

I promised my uncle, who was a cop, that I'd become a hero of justice and protect the city♥ So please don't kill meee♥♥

Please...♥ Don't kill me! I haven't accomplished anything as a hero yet! I don't want to die in a place like this♥!

I begged for my life with everything I had... but the corrupt cops wouldn't forgive me...

But once they realized I wasn't compatible with the test drugs, my immediate disposal was ordered.

My body bloated from an over-secretion of female hormones, and I was toyed with for weeks, forced into repeated climaxes...

And so, I was turned into an experimental animal for this facility, injected with massive doses of cell-fattening drugs to efficiently produce Heist-V!
